

Good afternoon, Everyone,

One of our current goals is to ensure that our water users have confidence in their water. We've recently teamed with the SVSU Marketing Department to work on this. The first step is to gather people's opinions about our tap water. The Marketing class put together a customer survey; it can be viewed at this [direct link](#). The survey is also available on our website at <https://baycodws.org/>

The goal of the SVSU class is to get at least 200 survey responses. The class will then analyze the data and report results back to us.

Thank you for your participation
