Re: 2020 Enbridge Pipeline Right-of-Way Maintenance

Dear Property Owner,

Our records indicate that you own or have an interest in property that is crossed by an Enbridge pipeline. This letter is to notify you of our plans to perform maintenance on the pipeline right-of-way. The right-of-way is a narrow stretch of land that is used to safely operate, inspect, maintain and repair Enbridge's pipelines. This maintenance activity will primarily include the mowing and clearing of overgrown vegetation that may obstruct visual inspection of the right-of-way or hinder access to the pipeline. As part of this maintenance, Enbridge will also ensure that pipeline markers are adequately installed and inspect for any structures that may be encroaching into the pipeline right-of-way.

Enbridge's right-of-way maintenance is scheduled to begin in July 2020 and continue throughout the end of the year. The schedule for this work is dependent on the weather and varying amounts of vegetation. At this time, we are unable to provide the exact date for when crews will be working on your property.

Thank you in advance for the cooperation and courtesy extended to our crews. For any questions, feel free to contact me at 989-667-2510 or [eric.wegner@enbridge.com](mailto:eric.wegner@enbridge.com).

Sincerely,

Eric Wegner  
Advisor, Lands & ROW
