

The image features a collage of various textured materials. On the left, there is a green fabric with a fine, woven pattern. To its right is a large, rectangular panel of blue fabric with a similar woven texture. Below these, a dark, vertically ribbed material is visible. The overall composition is layered and textured, showcasing different design materials.

exclusive design speakers

basalte

Exclusive design

Aalto is a unique collection of high-performance speakers for the world's most exclusive homes. Through top-notch Belgian engineering, they beautifully blend studio quality audio with your interior design language.

Aalto speakers are characterised by their innovative, architectural build and the variety of top-quality finishes and textures that fit your living room, dining area, home office etc. Aalto can be installed in-wall, on-wall or freestanding with the cabinet's ultra slim front trim as the eye-catching golden edge.

The speaker cabinet is made of aluminium, brass, bronze or nickel, setting a new standard in speaker manufacturing. It beautifully matches your interior finishes and Basalte's line of luxury light switches. For the front cover, you can choose from a handpicked palette of top quality fabrics by Gabriel and Kvadrat from Denmark.

Exceptional sound

Aalto active speakers combine first-class technology with our high-end multiroom audio system. This comprehensive solution provides top quality audio with an unequalled ease of use, so you can enjoy your own and streamed music around the house: perfectly tuned for every space and in crystal clear quality.

The integrated amplifier (200W) perfectly matches the speaker and eliminates the need to hide separate amplifiers. This improves the listening quality, simplifies the installation and significantly reduces cable runs.

We distribute your music around the house through a networked system, transporting high-resolution 24-bit uncompressed audio over Ethernet. Use the speaker's integrated DSP settings to fine-tune each Aalto and meet your personal needs.

All speakers have an integrated Bluetooth receiver and optical audio input to easily connect a TV or other audio source and again enjoy around the house. All of this is controlled through the Basalte Home app and other controls for KNX home automation.

Collection

I speaker types

D3 on-wall active speaker
0503-xxx

dimensions: 8 x 36,5 x 58,5 cm
weight: from 11 kg to 15 kg
(depending on the finish)
