# ABB

## German Lighting technology at your fingertips.

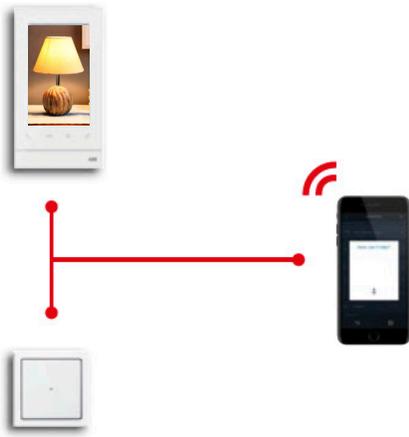

ABB is a technology leader with a history of innovation spanning more than 130 years. Their smart home solutions manage temperature, lighting and other ambient factors to match them exactly to your life by giving you user-friendly control via smartphone, making it possible to set the ambience and environment remotely. With their robust and reliable solutions, always be in control of your home!

## ABB i-bus® KNX

ABB i-bus® KNX is suitable especially as a solution for new construction in which a high-performance, future-proof and extensible system can be installed. As a global standard, ABB i-bus® KNX is especially flexible: The system offers a constantly growing diversity of modules and can therefore be extended without limits. All functions can also be adapted at a later point in time.

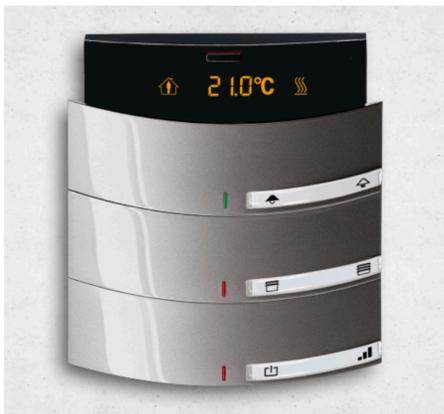

### Via voice control

“Switch on the ceiling lamp in the living room”. The system answers: “Okay. The ceiling light has been switched on.” With the assistance of the intelligent voice control you can control the functions in your house via voice commands. Especially practical when you don’t want to get up at the moment.

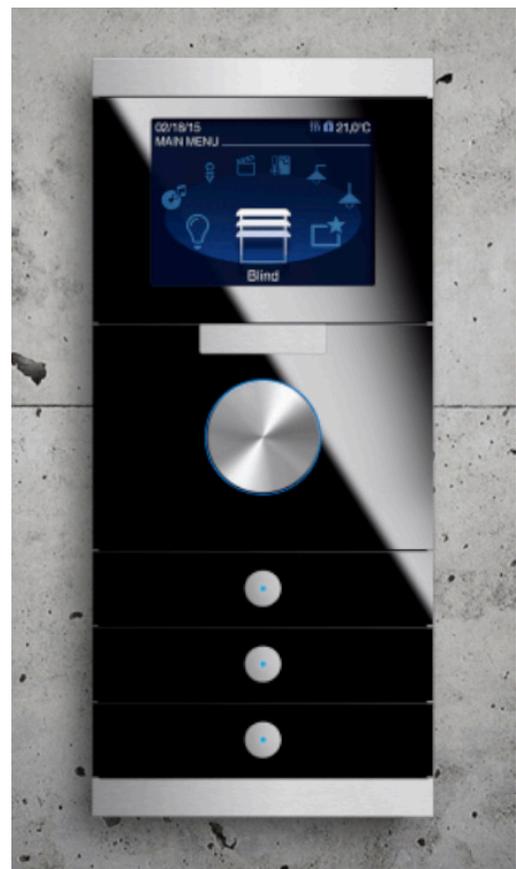

### Via Smart Home panel

The panel is configured with your personal settings and controls all functions in your living area from a central location on the wall. The touch screen is easy and comfortable to operate by swiping or tapping.

### Via Smart Home switch

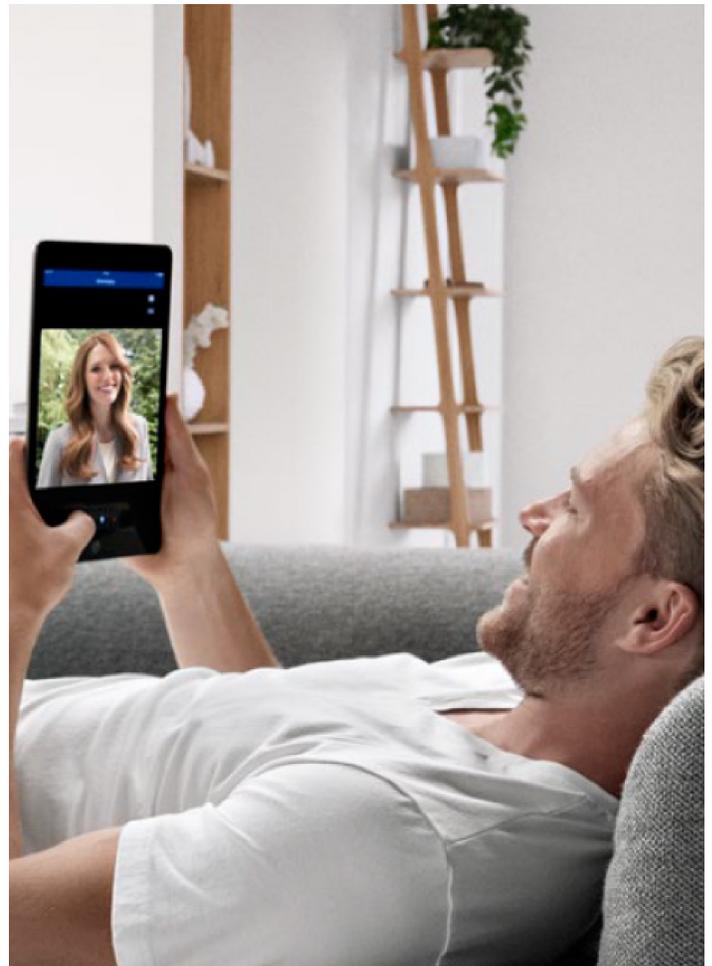

The classical operating mode to control your Smart Home is the switch. The modern design of our switches valorises every wall and the switches impress with their pleasant haptics and the hard-wearing user interface. They are available in different designs.

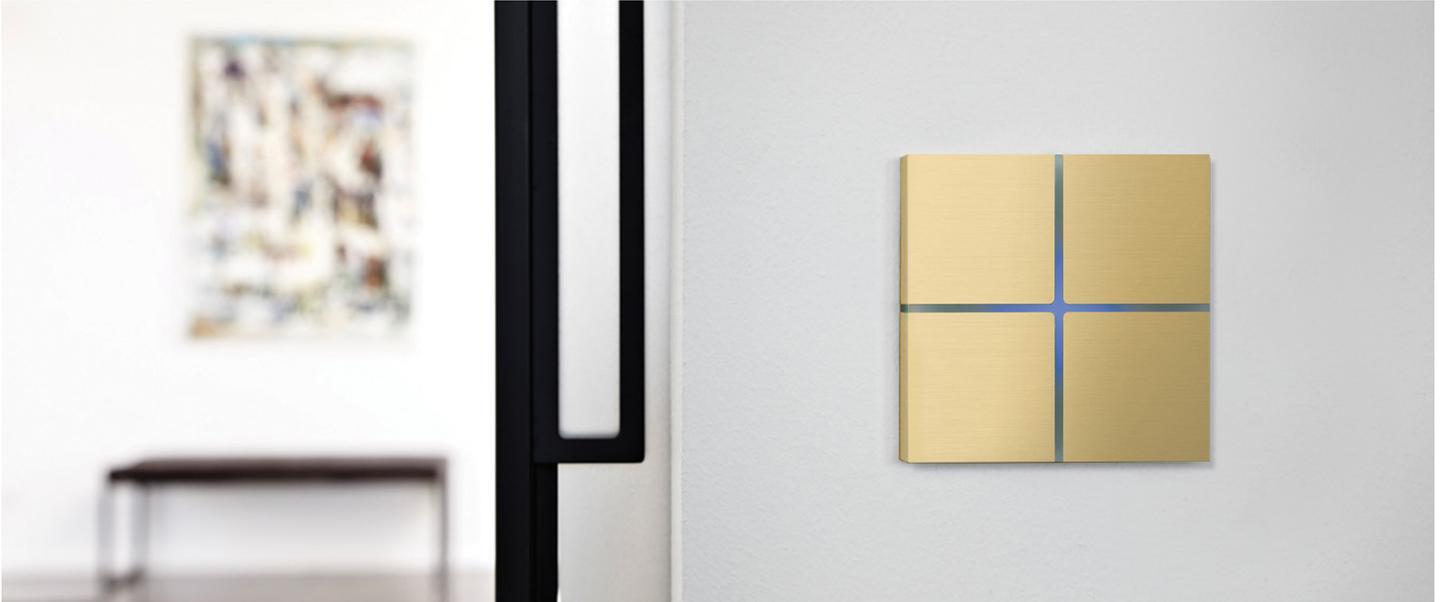

## ABB-Welcome

Your home is an expression of yourself. And with the ABB-Welcome system, you won't compromise impressive style for innovative technology. For Welcome is more than just a door video system - it is the future of home monitoring and security at your fingertips. It represents ease in communication, whether it is within your home, or to the outside world. Its IP gateway enables the integration of smart devices, allowing accessing your home camera interface, and controlling doors and lighting via ABBWelcome App whenever and wherever you want.

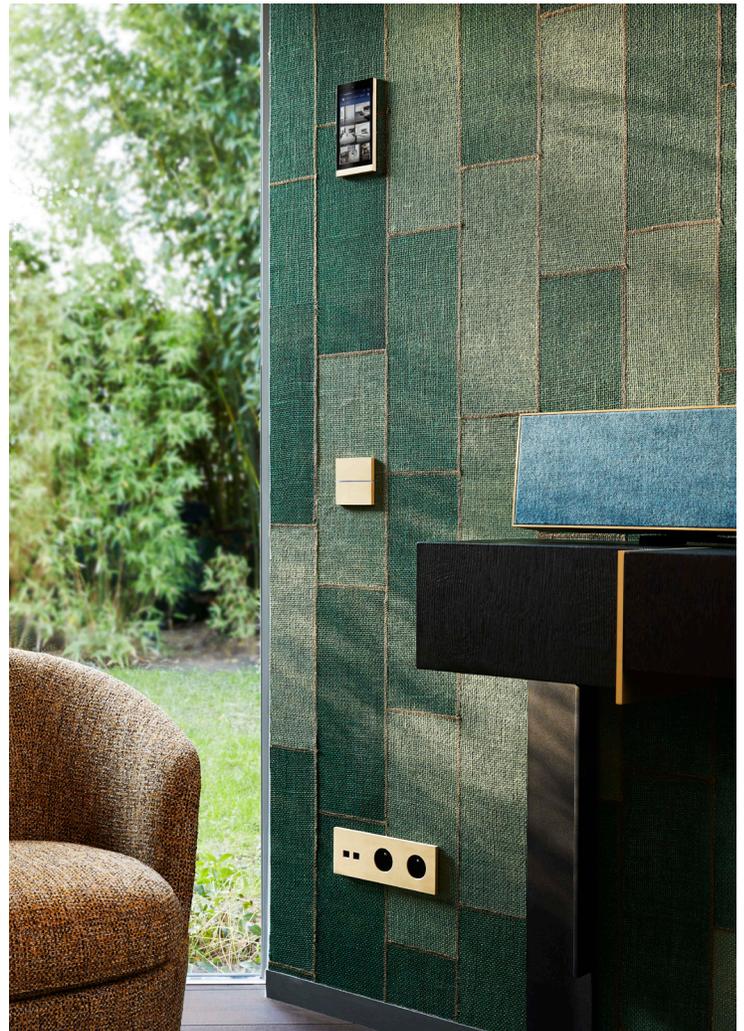

# Basalte

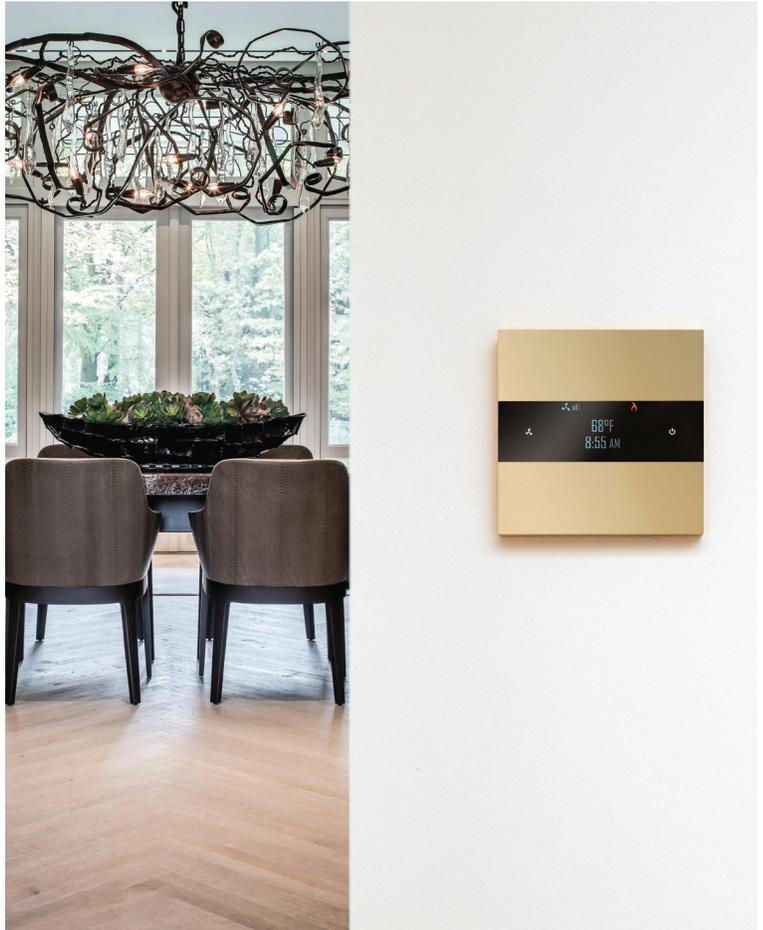

## Design for the Intelligent Home

Handmade in Belgium, Basalte believes in keeping things simple, intuitive and elegant, both in its form and function. All their products are meticulously designed and handcrafted in-house and have won more than 35 international design awards.

## DESEO

Deseo is a design thermostat and room controller to intuitively control your home climate, lighting and even music at the lightest touch. In standby, Deseo shows the current temperature and time. Touch the upper and lower surface to raise or lower your temperature set point. Touch left and right to change fan speed and mode. With multitouch, you can quickly turn the lights on and off, using a welcome and goodbye scene.

## ELLIE

Ellie is an elegant touch-sensitive panel for Basalte Home. It is your go-to point to control lights, climate, music and more around the house. Access your entire home, see everything at a glance and keep detailed functions only a tap away. Thanks to its slim design and premium finish, Ellie blends in beautifully with any interior.

## CHOPIN

Virtuoso and Classy, controlling Chopin feels a bit like playing the piano. Push the levers up or down to dim the lights, draw the curtains and let your favourite music enter the room.

## SENTIDO

Sentido is a multifunctional design switch to intuitively control lighting and more at a touch. Touching more than one surface at the same time turns on and off all the lights in a room using a general scene making it intuitive and user friendly.

## FIBONACCI

With its exceptional design, interchangeable text labels and proximity sensor, Fibonacci steps up the game of home automation. The touch-sensitive surface creates an effortless way of control and an unseen user experience.

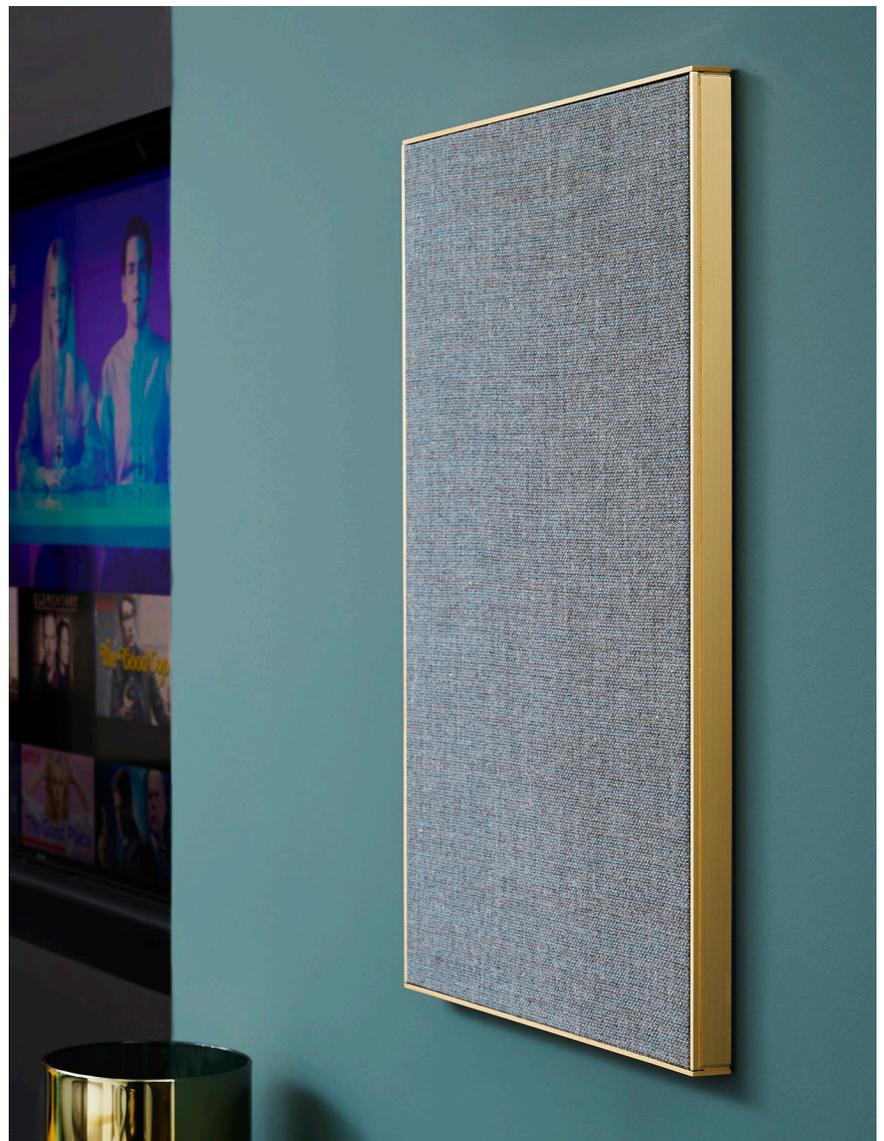

## MIRO

Nothing more versatile than our Miro remote to control all your devices at home. It comes in a slim and ergonomic design in timeless brushed black. The laser engraved buttons and a touch sensitive screen bring you right where you need to be. It supports wireless charging and connects to Basalte's core server allowing this one remote to simply control all functions in your home.

## AALTO

Aalto is a unique collection of high-performance speakers for exclusive homes. It combines innovative, architectural build with premium finishings and studio-quality sound. These are powerful active speakers, seamlessly matched to the integrated 200W amplifier. Precision-machined out of high-quality metals for acoustic perfection, Aalto also comes with integrated bluetooth to keep you and your loved ones connected

# Universal Remote Control

## Shades

Enjoy the luxury and convenience of automated window shades.

## Security

View live video from door stations and cameras on URC touchscreens and remotes.

# Hogar

- Wireless affordable solution requiring NO wiring, construction or renovation.
- Elegant touch panels designed to beautifully blend in your interior.

## Simple. Intuitive. Transformative

Hogar Controls is a USA based IoT company with design-first approach delivering homeowners, retailers and professional integrators a range of products that are innovative, intuitive and stylish. They are designed as plug-and-play solutions that provide user-friendly control and customised to fit the needs of your home.

-  Temperature control
-  Lighting control
-  Curtains & shade control
-  Automated scenes
-  Entertainment control
-  Home security
-  Digital locks

## Touch & Go

Pebble is a new wireless touch button that combines elegant design and functionality into a simple, personalized device to control everything in your home. Pebble allows you to customize up to 9 actions such as smart lighting, music, shading, thermostats, and more with a single touch.

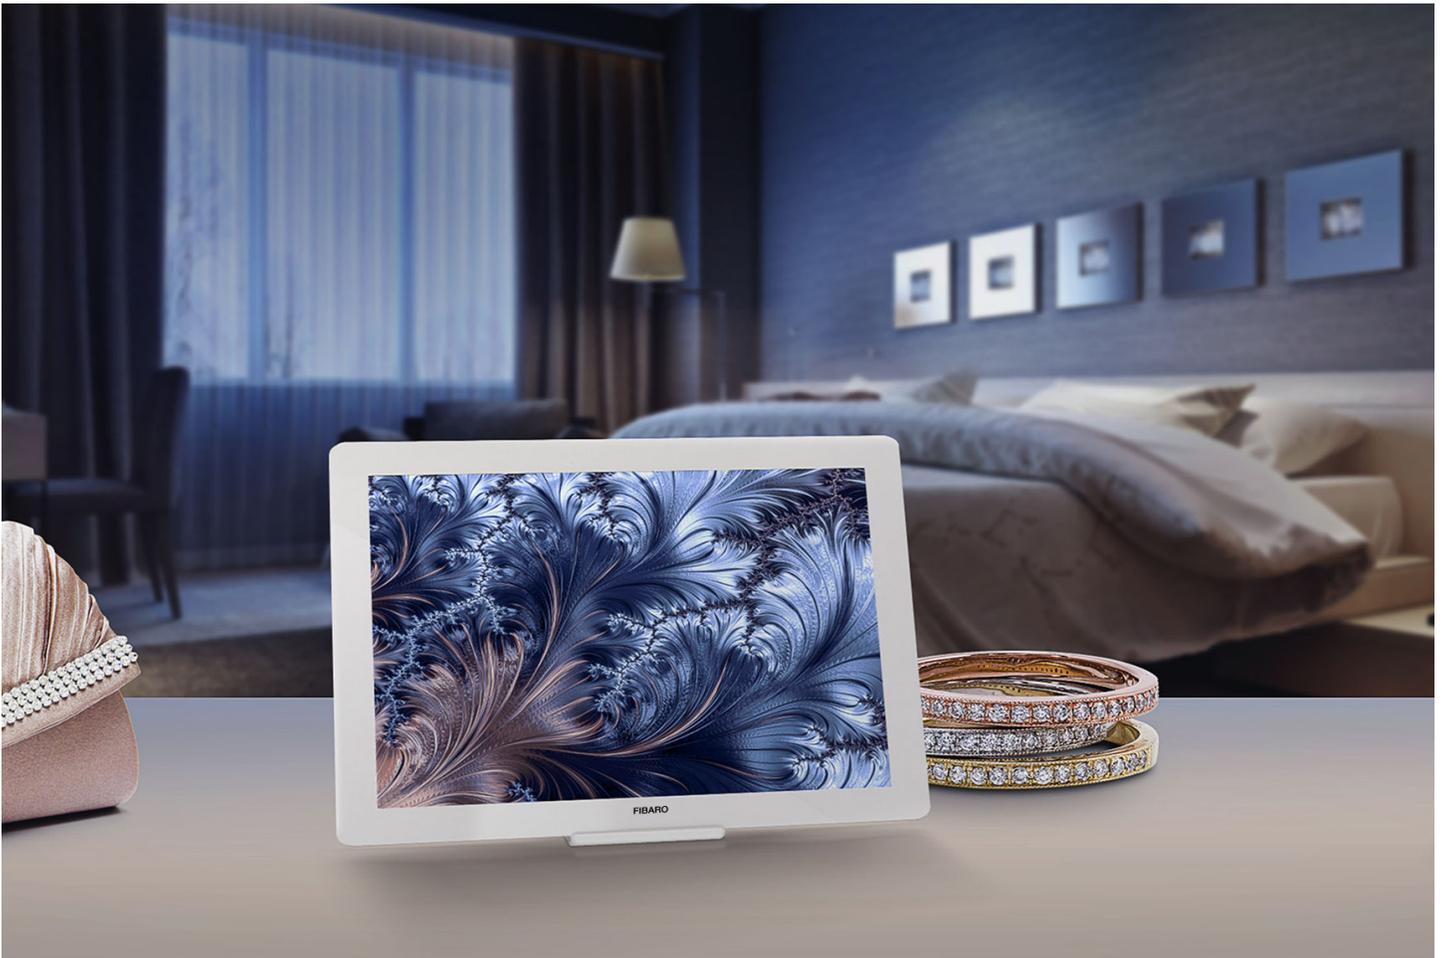

# Fibaro

## The expert in wireless automation requiring no renovation

**FIBARO**, a global brand based on the IoT technology, is designed, developed and produced entirely in Poland. They create all the smart home devices on their own and take care of even the smallest detail of the project. Settled on 6 continents, its become one of the most advanced, wireless smart home systems in the world

- Seamless integration of lighting and curtain modules behind your electrical switch boards without any new wiring.
- Use the RGBW module to create moods for any occasion
- Raise your hand and swipe in different directions to experience the power of gesture control using Fibaro Swipe
- Convenient access to your entire house using the wireless keyfob.

# Yale

Yale digital door locks bring you keyless convenience to unlock your door. Choose from the latest in digital door locking technology - fingerprint, smart card or keypad - to open your door. Each offers an immediate door opening solution and adds simplicity to your lifestyle.

- No need to remember to bring along your keys when you go out
- No need to lock your doors
- No more rummaging through your pockets, purses or bags
- No more forgotten and lost keys • No need for spare keys
- No more cutting keys for visitors

These digital door locks can also be paired with alarms to offer additional security from burglary, vandalism and fire. Combining cutting-edge technology with practical reliability, Yale digital door locks are the future of door locks.

## Key Features:

Single Push Action

ONE TOUCH Biometric Scan

PIN Code

RFID Card

Smart Connectivity: Bluetooth,  
Z-Wave and Wi-Fi

Mechanical Key Override

## Additional Features:

### Voice Guide Feature

The voice guided operating manual for easier and more convenient use.

### Automatic Locking

The Yale smart door lock series automatically locks the door after checking it is properly closed.

### Alarm (Break-in / Damage)

80dB alarm goes off if anyone attempts to damage the lock or force door open.

### Fake PIN Code

To prevent the PIN code from being exposed, It allows you to enter fake numbers before or after entering your PIN code.

### Low Battery and Emergency Power

Low battery warning with alarm and LED. When the batteries are completely discharged, you can easily supply emergency power to the lock with the standard 9V battery.

# Lutron Shading

## Noiseless and Precision controlled

Manufactured in the USA, Lutron has over 20 years of experience and knowledge in the automated shading industry, and are the world leader in precision controlled automated blinds. They provide the entire shading solution ranging from their completely noiseless motors to power supplies, processors and the actual fabrics. They seamlessly integrate daylight, security systems, and HVAC systems for total home control solutions that help save energy ensuring the highest quality products and a satisfying customer experience.

## The Transformative Power of Lutron

### Elegance & Ambience

Stylish control and fabric options coupled with innovative technology elegantly transition a space to create the right amount of light for any activity.

### Save Energy

Utilize your shading system to save additional energy beyond routine use of shades. “Winter warm” opens the shades, taking advantage of sunlight warming a southern façade.

### Noiseless

All Lutron motors are completely noiseless and feature intelligent hembar alignment, which was designed to synchronize all automated shades in a single room, or in an entire home.

### Protect Furnishings

Diffuse light and prevent glare from washing out a computer or television screen. Shading systems also protect furniture, fine art, rugs, and even wood surfaces, from the sun’s damaging UV rays.

# Evervue

## The most stylish and thinnest smart Mirror TV

Evervue USA Inc. is redefining the realm of Bathroom TVs, Mirror TVs, Kitchen TVs, Outdoor TVs, Smart Mirrors, and Lighted Mirrors since 2001.
