

High Risk Clients

We strongly encourage all clients, but especially those who are at high risk or for those who care for the populations who are at higher risk, to continue to utilize our no-contact services whenever possible.

High risk patients include:

- 01** Individuals 65 or older
- 02** Individuals with chronic lung disease or moderate to severe asthma
- 03** individuals who are immunocompromised
- 04** Individuals who have serious heart conditions
- 05** Pregnant women
- 06** Individuals determined high risk by a licensed health care provider

These no-contact services include virtual, remote and online training programs.
