“ *As the leading Roofing Industry Risk Advisor, it is critical that our roofing clients have access to loss control and OSHA compliance training. Brauner Safety is our leading safety and loss control partner. We serve many of the same roofing professionals with Jim Brauner and his firm.*

***Since Brauner Safety began providing CERTA training for our clients, their torch losses in our roofing portfolio are zero.***

*Historically torch losses in the roofing industry average a minimum of \$1M a month in financial loss. Jim's ability to engage both field staff and operation leaders on torch application techniques clearly delivers enhanced efficiencies and reduces risk for our roofing clients.*

— Robert (Rob) Foote, President Frank H. Furman Insurance, Inc.
