Health Guarantee from Nothing Better English Labradors.

With any questions please email nothingbetterenglishlabrador@gmail.com:

Our 3 year Health guarantees will now be offered to our clients/puppy parents if the following 3 requirements are met. We do not expect a puppy to remain as healthy as possible without quality food, vitamins, and veterinary care and have partnered with excellent brands to provide just that.

Optional- 48 hour Health Warranty claim:
Strongly encouraged but this is optional and does not have to be completed to get the health guarantee. It does have to be completed to make a health claim on the immediate health of the puppy upon receiving it.
To make a 48 hour warranty claim on the puppy. You must have your puppy examined by a licensed veterinarian of your choice within 2 business days from pick up after receiving your puppy. This is to look over your puppy and satisfy both of you that it is in good health. We are not responsible for any conditions deemed normal for a puppy or that a puppy would grow out of. The following conditions will not be covered under warranty for replacement of a puppy as they are very common in dogs and are not normally life threatening: skin allergies, mites, intestinal bacteria, intestinal parasite, eye ulcers, Kennel cough, inverted vulva, testicles not dropping, overbites, underbites, and/or hernias.The seller must be notified the day of the visit and send all veterinary records of life threatening findings if the buyer is wanting to make a claim against the puppy’s health. If no vet visit is performed within 48 hours after pick up the health warranty claim will be immediately void releasing the seller from this portion of the contract.

(Optional: NuVet has done a lot of research and for Labrador Retrievers as a breed they recommend NuVet Joint Plus K-9 to help with joint hip and elbow issues that Labs tend to have as they age. You are welcome to look into this further to see if that's something you're interested in purchasing for your puppy. We personally like to use it for the Labradors we own for the first two years of life (and continue through their lifetime) while they are growing to make sure they have all the nutrients they need to grow and develop their joints properly. We highly recommend this product! This is an optional addition to your order because we do NOT require this except for OFA's see below for details.)
