COMPANY OVERVIEW

Federal programs do not fail because of strategy. They fail at the execution layer, where acquisition actions, financial data, and compliance requirements must align in real time.

Corso Enterprise operates inside that execution layer.

We support program offices and prime contractors by ensuring acquisition actions are structured correctly, funding aligns to execution, and all activities remain compliant, traceable, and audit-ready. Our role is to eliminate breakdowns between contracting, program management, and financial oversight that create risk, delay, and audit exposure.

CORE EXECUTION CAPABILITIES

Program Execution & Coordination

Corso maintains operational control across program activities by aligning stakeholders, tracking performance, and ensuring execution remains synchronized with contract and funding requirements.

Acquisition & Contract Execution Support

We support pre-award and post-award activities, contract administration, modifications, and FAR-aligned execution to ensure acquisition actions are accurate, compliant, and defensible.

Financial Oversight & Reconciliation Support

We support the alignment of financial data with program execution by coordinating reconciliation activities, validating transaction support, and ensuring reporting accuracy.

Audit Readiness & Compliance Execution

Corso manages Provided By Client (PBC) responses, supports Notice of Findings and Recommendations (NFR) tracking and remediation, and ensures control documentation and supporting artifacts are complete, accurate, and audit-ready.

Governance & Internal Control Alignment

We support the development and execution of control frameworks that ensure program activities are consistently documented, repeatable, and aligned with federal audit standards.

WHAT MAKES CORSO DIFFERENT

Most firms advise. Corso executes.

- We operate within active program environments, not outside them
- We align acquisition, financial, and compliance activities in real time
- We reduce audit risk by ensuring documentation and execution match
- We strengthen program performance without adding management overhead

PAST PERFORMANCE HIGHLIGHT

Supported the Department of Homeland Security under contracts:

70RSAT23FR0000140

70RSAT20FR0000098

Provided execution support across acquisition coordination, program operations, and compliance tracking within high-visibility federal environments. Supported alignment between contract execution, financial processes, and audit requirements.

TEAMING VALUE

Corso provides primes and government program offices with a controlled execution layer that ensures:

- Acquisition actions are compliant and properly documented
- Financial and program data align and reconcile
- Audit deliverables are complete, accurate, and defensible
- Program execution remains stable under oversight and review

We integrate seamlessly into existing teams to strengthen delivery without disrupting operations.
