For further information and
registration go to our website below
WWW.NORFOLKNUTRIENTNEUTRALITY.CO.UK

Nutrient Neutrality has caused planning applications to stop progressing in many parts of Norfolk since March 2022.

We have created a scheme that will allow new builds to be completed and will offer free installations of high performance treatment plants

We can replace any suitable septic tank OR any older sewage treatment plants, absolutely FREE. Both are contributing to river pollution with Nitrogen and Phosphates, as noted by Natural England. Through off-site mitigation, we earn credits that can be offset against other new housing developments. This allows us to install your plant for free
