HOW THE SALE IS RUN:

Our sale is run how we prefer to buy bulls. We keep it transparent, straight forward and no bidder number needed. The day of the sale the bulls are available for viewing behind the cattle shed where the sale takes place. Then we ask all interested buyers to write their name on the sale board, on all of the bulls they are interested in. At 1pm we bid off between the names on the board starting at the listed Base Price in the catalog. Buyers always have the option of retracting their name during the sale, before the bidding starts on that particular bull.

We would like to invite you to come early to view the bulls and bring your family for dinner starting at 11:30 am.

Sale starts at 1pm

If you can't make it on sale day, we can contact you when it's time to bid.

TERMS & CONDITIONS

1. Each animal will be sold without reservations to the highest bidder.
2. Term of sale is cash.
3. Every precaution will be exercised for the safety and welfare of those attending the sale.
4. Buyer will assume all risk of animals as soon as they are declared sold.
5. Arhart Farms is not responsible for any accidents the day of the sale.
6. Information in catalog is subject to change, announcements made sale day take precedence over printed material.

DATA GLOSSARY & INFORMATION

Data provided in this catalog compares our bulls as a contemporary group being fed and treated the same and experiencing similar environmental conditions.

ULTRASOUND DATA

DAYS OF AGE: Days of age at scanning.

MARBLING SCORE: It is the major factor used in determining USDA Quality grade. Non-adjusted.

ACTUAL BACKFAT: Actual back fat thickness expressed in inches

ACTUAL RIBEYE: non adjusted estimated ribeye area.

BIRTH WEIGHT: Birth weight.

ADJUSTED 205: Adjusted Weaning Weight.

ADJUSTED YW: 365-day Adjusted Yearling Weight

TEST GAIN: Total gain divided by the number of days on the test. We use the test gain as a tool to compare our bulls against each other, instead of feeding hard for high gains. We are careful to avoid over conditioning which can affect future fertility and soundness.

205 DAY INDEX: The 205 day index reflects how each of our individual bulls performed, pre-weaning, relative to the average performance of all his other herdmates. The index represents each bull's genetic potential for early growth as well as the dam's milk producing abilities. A 100 is average.

NURSING RATIO: Nursing Ratio at weaning. This allows us to keep females that produce more milk and more pounds of calf. Similar to the 205 day index, anything above our herd average of 100 is above average.

SCROTAL: Non adjusted Scrotal circumference listed in centimeters.

If you prefer to view the bull data as a spreadsheet, email us at jjarhart@santel.net or download a copy at www.arhartfarms.com.

44th annual bull sale
MARCH 2, 2024

DINNER AT 11:30AM :: SALE AT 1PM

at the farm 39088 224th St. Alpena, SD

Offering 40 Angus, Simmental & SimAngus Yearling Bulls

PICTURES, PRODUCTION & ULTRASOUND DATA AT

WWW.ARHARTFARMS.COM

Jonathan & Joy (605) 350-0018

39088 224th St. Alpena, SD

We are excited to offer for sale 40 powerful bulls representing the top 30% of our bull calf crop. We invite you to stop in anytime before the sale, to view the bulls and further discuss your cowherd and your production goals. If you call us ahead of time we'll have the bulls waiting for you behind the barn.

The goal of our sale is to provide you with:

- **Solid Genetics:** Our bulls are backed by over 55 years of selecting proven AI sires and making mating decisions based on our herd production data and bloodlines. We are commercial cattlemen first and foremost, selecting genetics that result in pounds on weaned or backgrounded calves, fat cattle with carcass merit and frame suitable for grid marketing, and heifers with ideal maternal traits who join our cow herd as replacements.
- **Affordable Prices:** Our bulls are started at reasonable prices and bids are raised in \$100 increments. Our volume discount has saved our buyers thousands of dollars. Save 5% when you buy 2 bulls, add 1% for each additional bull up to a total of 10% off 7 bulls.
- **Transparent Process:** We want buyers to know exactly where the bid is and how many people they are bidding against. We want to give each bidder time to make decisions without being rushed. We also offer the option to place phone bids. This will be handled by a representative that can bid for you or call you, so you can bid live on the phone.
- **Security:** We self-insure our bulls at no cost to you. If your bull has a performance or health issue in the first breeding season we will make it right with either credit or a refund equal to the difference of sell price and purchase price.
- **Convenience:** We will keep your bull free of charge until you are ready for turn-out. We do this so we can ensure proper growth and development as they mature and avoid over-conditioning. Call us when you are ready for turn out and we will deliver your bull for free. Before the bulls are delivered, depending on your preference, we will fly tag and pour them.
- **Bulls Ready for Breeding Season:** As of Feb. 7th, the bulls averaged .20 inch of backfat at an average of 339 days of age. They are growing and maturing but are lean with minimal cover. Currently on a 48 mcal ration, they will be in optimal condition for breeding season. In April, each bull will have a thorough breeding soundness exam by Dr. Jesse Cruse of Huron Vet Clinic, routine vaccinations and a magnet to protect against hardware.

We invite you and your family to join us for a Steak Sandwich Dinner starting at 11:30am.

Jonathan & Joy Arhart family
