For those families who have more than one child enrolled, the oldest child's tuition rate is the full rate and the discounts are applied in descending age order.

Example:

A family with six children, having 2 Middle School students, 3 Lower School students and 1 Kindergarten student, would pay \$5200 for the first child (Middle School), then \$3800 for the second child (Middle School) and \$2100 for the third child (Lower School), then \$2100 for the fourth child (Lower School), \$1525 for the fifth child (Kindergarten), and no tuition for the sixth child.

There are three options for making tuition payments:

1. Full tuition along with all fees paid by August 15th
2. Half of the full tuition, along with all fees, paid by August 15th, and the other half paid by February 1st
3. Ten equal tuition payments - the first payment (to also include all fees) made by August 15th, and the nine subsequent payments made in the months of October through June via an automatic payment plan.

Parents choose the tuition plan when the contract is signed.
