

THE GONZO BAG

The Gonzo Bag is designed to absorb and trap odoriferous organic chemicals such as those emitted by food, flowering plants, poop, and industrial chemicals. You can use the Gonzo Bag to store odoriferous material for up to six months without fear of any detectable odor escaping the bag. The Gonzo Bag can be used while wilderness camping to store food and keep bears, raccoons, and other animals from finding it. You can use it to keep used dog poop bags odor free in your car until you get them to a trash receptacle. The Gonzo Bag has many uses and is reusable – think of your own!

The Gonzo Bag Use Instructions

To effectively contain 100 percent of organic vapors and odors, use the following four simple steps and you may travel with or ship your smelly materials safely assured that they cannot be smelled by human or animal:

Place up to one pound of any food, odoriferous chemical or plant material in a sealed, plastic bag. The best bag to use for this purpose is a Foodsaver[®] or other heat sealed, 12-inch wide plastic bag because it will easily slip inside the Gonzo Bag. A standard Ziploc or turkey bag will work fine. You can put dog poop bags directly into the Gonzo Bag if they are tied at the top and not leaking.

NOTE: You may place food items, herbs, tobacco, etc. directly into the Gonzo Bag, but doing this will reduce the length of time that the bag will absorb 100% of odors. The Gonzo Bag is designed to be reused, but its effectiveness will depend on what is put in the bag.

1.) Slip your plastic bag into the Gonzo Bag. (Figure 1). Wash your hands or remove your gloves before touching the outside of the bag!

Figure 1

2.) Fold the flap at the top of the Gonzo Bag over the contents of the bag so that it covers the top of everything loaded into the bag (Figure 2).

Continued other side.

3.) Roll the top from the front to the back until the Velcro meets and press to seal (Figures 3 and 4).

Figure 3

4.) If your hands or the outside of the Gonzo Bag have come into contact with anything you are storing inside the bag, wipe the outside of the Gonzo Bag with rubbing alcohol. This will ensure that the bag does not give off any odors.

You are now protected! The special, activated carbon filter built into the Gonzo Bag will effectively contain 100 percent of organic vapors and odors for months, if used as directed. Even dogs can't smell what's inside – guaranteed by Gonzo, one smart, big-nosed animal!
