Acrylic Filter (Hanging Type)

—Eyes Protection/Anti Spy—

❶ If the display's thickness is less than 8mm, use the short hole installation way.

❷ If the display's thickness is between 8-16mm, use the long hole installation way.

❸ If the thickness of the monitor is greater than 20mm, choose the installation method with the short hole facing up.

LAYERED PROTECTION
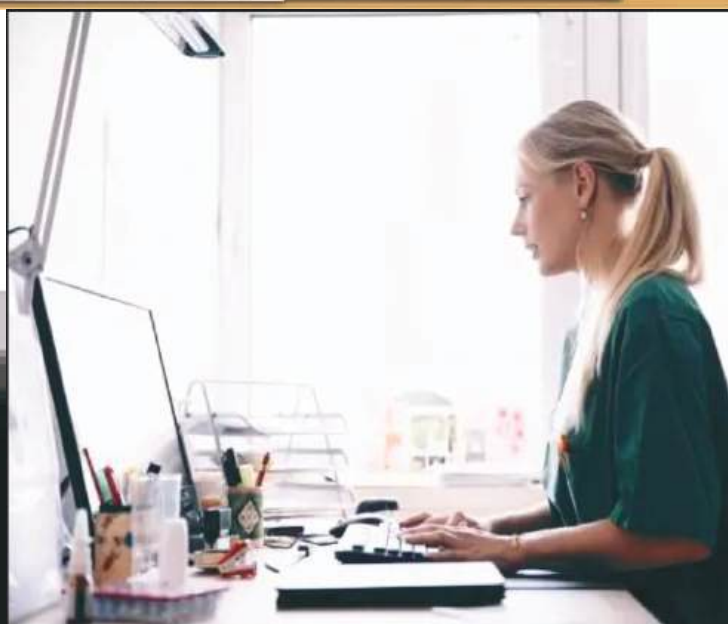

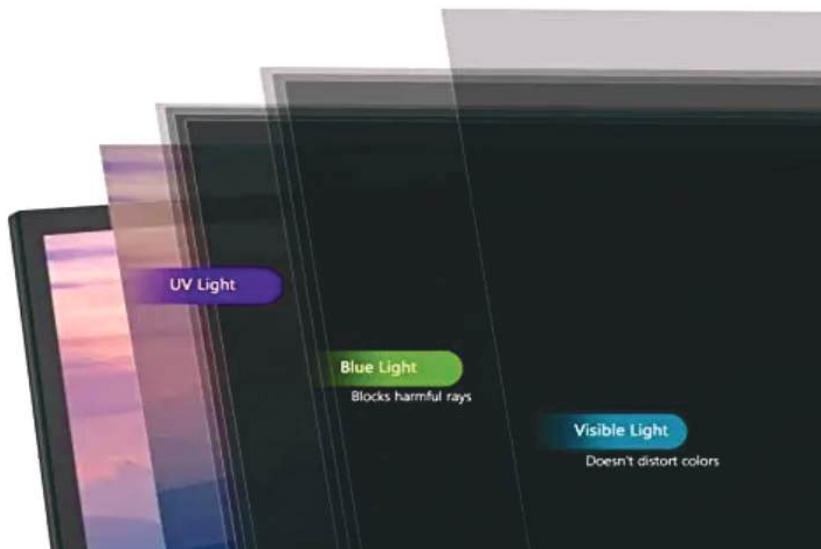

| PRIVACY PROTECTION | UV PROTECTION | GLARE REDUCTION | BLOCKS BLUE LIGHT | 60% Transmittance |

UV Light

Blue Light
Blocks harmful rays

Visible Light
Doesn't distort colors

Great for privacy and reducing glare - reversible between glossy and matte.

Anti Blue Light Matte Privacy Filter

Privacy Basic Parameters

Products Introduction: Made of imported materials, Using the Microlouver (micro louver) optical technology,and just the person who are in front of the screen can see the information on the screen clearly, also its image is clear, unambiguous, without distortion; as for others who are on both sides, they just can see the black image of the screen, they can not see any information .And privacy angle is 28 degree, so it can allow you to use the computer more safe and secure, and protect commercial secrets and personal privacy.1 face shiny & 1 face mate.

PROPERTY
RENTALS AND SALES

Regions 1 and 2 saw overall
improvement in sectors A and D
compared to past sales records. These
teams attribute their results to favorable
weather patterns and attractive interest
rates, among other factors. Regions 3
and 4 continue to post overall
improvements in all sectors, though
progress was affected by scarcity of
materials. Regions 5 and 6 also reported
significant gains in both quantity and
quality of completed transactions, with
excellent customer feedback.
