

Slip Stitch

To attach a folded fabric edge to flat fabric with stitches barely visible on the right side.

Right Handed

Left Handed

1. Thread your needle. Knot your thread as a single thread.

2. Bring your needle up through the fold in the fabric

3. Take your needle through flat fabric, catching 2 threads

4. Pass your needle inside fold of fabric for a short distance

5. Take your needle through flat fabric again, catching 2 threads

Tip: enter and exit the folded fabric just below the fold on the inside, to keep the stitches invisible on the wrong side too.
