

Project Apollo

An SDA TAP Lab Tech Accelerator

Project Apollo

- A collaborative, voluntary SDA & Space Battle Management tech accelerator
- Focused on protection & defense from GEO Direct Ascent Anti Satellites (DA ASAT)
- Up to four cohorts per year, each cohort runs 3-month cycles
- Problem statements announced & applications accepted in the quarter prior to each cohort
- Participants will be given access to an unclassified sandbox to facilitate tech maturation
- Seeking to quickly mature software prototypes into commercial products
- Targeting ~TRL 4 tech upon start of cohort, ~TRL 6 upon graduation
- Speakers & Mentorship: Operators, Military Leaders, Experts, Sponsors
- Work collaboratively alongside a rotation of students
- Remote participants accepted - preference for in-residence
- Up to five companies may be selected each cohort
- Participants demonstrate capability at the end of each cohort

Notional Schedule – see sdataplab.org for up-to-date information
