

BOAMBEE

ANGUS

Autumn 2024

Green, Green Grass!!

The stormy weather has helped us kick off 2024, and although we are still chasing some good run off rain to fill creeks and dams, we cannot complain how well our natural pastures are performing. As April roles in, the forecast is for good rain to begin the month and we were lucky enough to pick up a fantastic fall of 110mls of rain. We hope that it was shared around the state.

The cattle market has picked up in the last few months. We all knew a correction was set to happen, although we didn't expect to see prices fall as much as they did in the Spring of 2023.

As we head into the Autumn of 2024, we are getting set for planting winter crops and also weaning all of our Spring drop calves, which we are over the moon with how both new and old genetics have worked within our herd.

Around the Local Cattle Sales

Maitland Female Sale

The Annual Maitland Angus Female Sale was held in March 2024. We sent in some outstanding females that sold very well and stayed in the local area.

We sold a yard of heifers with calves at foot that were preg tested back in calf for \$3,200 each, and a beautiful yard of preg tested heifers for \$2,000. Both lots were purchased by new clients. We also offered a yard of yearling heifers that were ready to join to the bull of the buyers' choice. They were purchased by repeat clients, The Percival Family of Buchanan. We are very thankful for the support shown in our Program.

1st Annual Maitland Angus Weaner Sale

This year on the 4th of April, Bowe and Lidbury Stock & Station Agents held their first Angus weaner sale at Maitland Saleyards. What an outstanding line up of weaners that were on offer from the local area, and to everyone's credit, it paid off with a very strong cattle market.

We sold a run of 50 Angus steers 6/7 months that were off first calf heifers for a top of \$1,170. We were very pleased with the result.

We also saw an outstanding display of Boambee genetics throughout the sale from clients who had done a fantastic job on presenting their weaners.

Some of the highlights:

Anambah Lakes Farming

Sold a beautiful pen of steers to \$1280
and their heifer yard making \$1040

R and B Livestock NSW

Sold a cracking yard of young steers for \$1120
and the heifer portion hitting \$800

Dopmina P/L

Sold a top yard of heifers with plenty of punch for \$1100

Congratulations to all involved and an exceptional job done by the team at Bowe and Lidbury who conducted the sale.

Genetics

As we lead into the Autumn, weaning is in full swing and autumn calving is almost over. We are very excited at what we are seeing in our herd.

We have just weaned our first run of ET calves, and what a standout group they are! Texas Undine M508 and Witherswood Kerry P113 lead the way with consistency and type. Sterling Pacific 904 calves out of Texas Undine M508 are full of data with plenty of carcass and growth. The Texas Iceman R725 x Witherswood Kerry P113 are stylish and have a lot of punch and power and Iceman certainly stamps his head on them!

We are also excited to be weaning the first crop of calves sired by the two gun sires we purchased in the spring of 2022 being Millah Murrah Stormtrooper S69 and Karoo Junior R241. Both of these sires were selected for their ease of calving and outstanding growth traits, with balanced carcass data. Both bulls are backed by plenty of history coming from proven female lines out of both the Millah Murrah and Karoo herds. We love the type of progeny these boys have delivered, maintaining the depth and softness we strive to breed. We are enjoying what we are seeing!

Now that Autumn calving is almost over, we can take the time to view the progeny on the ground from new genetics that has entered our herd most recently. Pine View Vezina J166 and LVVF Tanker 14 were two semen sires we added into the joinings last year for some out cross genetics from America. Their calving ease and low birth weight were certainly selling points for us. Both of these bulls have presented well. The lead of their calves are now hitting 6 weeks of age and showing exceptional growth for age which we are loving. They are presenting very true to type.

We also have sires with progeny on the ground again for the 3rd year running. We cannot get away from the Texas Iceman R725 calves just for their balance and type. You cannot help but admire the softness and carcass of these calves. Dunoon Recharge R102 has a few amongst the group also, and they are something special with plenty of presence and style. There is a lot to like about these calves!

Millah Murrah Stormtrooper S69

Karoo P195 Junior R241

Te Mania Genetics Join Our Herd

In August 2023 we took a trip out to Walgett NSW for the Te Mania Northern Bull Sale in the search for our next stud sire. A look at Te Mania bulls had been on the cards for sometime. We were fortunate enough to secure two bulls, Te Mania Super S1474 and Te Mania Sussex S1488. Both bulls representing the characteristics and data Te Mania have been working on for sometime!

Making a decision to purchase these two bulls was easy for Boambee Angus. With low birth to high growth, but also carrying plenty of style and presence, plus the longevity in their pedigree these bulls were the complete package.

We really love the carcass data these bulls display, which is something we have been focusing on quite a lot. It is all about eating quality! This is what we breed cattle for, and these bulls are going to excel within our herd with what they'll add. With big EMA and ample IMF, but also carrying positive fats and plenty of carcass weight these bulls are the perfect fit.

Te Mania Sussex VTM21S1488

Te Mania Super VTM21S1474

With our industry being paid on weight, more kilos count, but the extra softness and eating quality these bulls will add to both our herd and our clients herds through sourcing their future progeny, will make the experience from paddock to plate a pleasure for all.

We will see their first progeny hit the ground running this spring!

Inaugural Bull & Female Sale

This year we will be conducting our 1st Annual Bull and Female Sale on property on Friday 9th August 2024, consisting of 30 stud Angus bulls, 8 stud female lots and 80 commercial yearling Heifers.

This year we will feature 7 sons of the 2021 Texas Angus top selling bull, Texas Iceman R725, purchased by Mackas Pastoral. He is a bull you have to admire for the consistent type he stamps on his progeny, with plenty of depth and carcass quality.

Musgrave Avenger will also feature sons in the catalogue bringing calving ease with plenty of growth, but the carcass shape and softness these bulls present can't be missed.

Welcome Tim Norrie

In January we welcomed a new member to the Boambee team, Tim Norrie.

Tim comes to us with a wealth of industry knowledge and experience. He worked overseas for 17 years with time spent in Texas, USA, and in Ontario and Alberta, Canada. Six of those years were spent in the stud industry in Canada as Stud Manager for Bar Pipe Herefords.

Tim also worked with TRT Pastoral Group, Victoria, as Livestock Manager where he gained vast commercial experience. In more recent years Tim has managed properties in the Gloucester region of NSW.

With his 'can do' approach to livestock and pastoral development, Tim is a valued member of our operation. Be sure to say hello and welcome Tim to our Boambee team.
