

Autumn 2022

What an exciting start to the year!

The cattle market has hit new levels not seen before, along with the rest of the industry, whether its livestock, cropping or along the production line. Australian agriculture looks to be in good hands for years to come.

Here at Boambee, it has been a very wet start to the year with very little summer heat, but plenty of humidity to make up for it. The entire East Coast of Australia has experienced some challenging times in recent months with major flooding. We have been very fortunate, however we still experienced riverine flooding, but it did not lead to a disaster that we have seen/dealt with in the past.

In amongst the wet weather, autumn calving has commenced with plenty of exciting new genetics on the ground and thriving. It has been a challenge to get sowing underway in these wet conditions, but would take that over drought any day.

We look forward to what the rest of 2022 brings and hope we can assist in sourcing the genetics you are after in our bulls and females here at Boambee.

Genetics

We have already seen many new calves on the ground to start the year off which is very exciting. Progeny from artificial insemination (AI) sires include, Texas PowerPlay P613, Sterling Pacific 904, Musgrave Avenger and Millah Murrah Paratrooper P15.

Also our walking sires Sugarloaf Harvestor N169 and Knowla Packer P141, progeny are hard to miss with the consistency and type that they bring to the females they are joined with.

Harvestor N169 daughter "Boambee Kerry S25"

Musgrave Avenger son "Boambee Sensation S13"

The excitement doesn't finish with our autumn calving females. Heading into late winter/ spring, we will see our next crop of calves start hitting the ground. The results from our genetic choices will be some of the first progeny in Australia, from sires such as the 2021 Texas Angus top selling bull. Texas Iceman R725 sold to Mackas Pastoral for a record breaking \$225,000. Iceman R725 is a bull that we happened to see in the flesh and could not fault.

Also, we will see first progeny from AI sires such as Wilks Regiment 9035, Montana Elevation 7108 and Sydgen Bonus 8084 just to name a few.

Some of our young stud sires here at Boambee, Witherswood Lock Up P80 and Premier Stunner R84, will see their first progeny hit the ground this season. We cannot wait to see what they bring to our herd.

Walking Sire "Premier Stunner R84"

Texas Undine M508

Texas Undine M508 was the top priced female that we purchased at the 2021 Texas Angus Female Sale at Warialda in Northern NSW, along with her beautiful Paringa Katapult heifer calf Texas Undine S184.

Since M508 has arrived at her new home here at Boambee, she has weaned S184, who we broke in for the local show circuit where she performed well.

"Texas Undine M508", with heifer calf "Boambee Undine T4"

M508 has recently calved again and has given us another exceptional heifer, Boambee Undine T4. The sire of T4 is Sterling Pacific 904 and she would be amongst some of the first progeny of his in Australia. We are thrilled with what this female brings to our herd and cannot wait for her to head into the donor pen and be one of our leading embryo transfer (ET) females.

Around the Shows

So far this year we have competed at our local shows, Maitland and Newcastle, with lots of fun had by everyone involved, meeting new faces and catching up with old ones.

It is great for the shows to be back, bigger and better after the challenging years faced with COVID-19.

Supreme Exhibit Maitland Show 2022 "Boambee Ela R43"

Maitland Show

Supreme Exhibit with "Boambee Ela R43"
Interbreed Junior Champion Bull
Champion Pair of Heifers
Champion Group of Three Animals

Newcastle Show

Reserve Champion Bull "Boambee Ross R27"
Reserve Champion Female
Champion Pair of Bulls
Champion Pair of Heifers
Champion Group of Three Animals

Sales — Angus Verified

When March comes around each year, it is time for our spring weaners to hit the market.

This year we started off by offering 10 Commercial Angus Verified weaner heifers at the Maitland Annual Angus Female Sale conducted by Bowe & Lidbury Stock and Station Agents.

With an exceptional line up of females our heifers sold for a top of \$2,600 per head. A fantastic result for coming straight off mum. We know they were glad for them to be gone!

Later in the month at the Maitland Weaner Store Sale, also conducted by Bowe & Lidbury Stock and Station Agents, we lined up 76 Angus Verified steers to a top of \$2,375 per head with the top yard weighing 340kgs average.

Our steers were in high demand. The success of the strong market didn't just stop at the top yard, our entire draft of steers came back at a whopping average of \$2,185 per head. It's a result we are overwhelmed with and never seen before. We thank all successful bidders and underbidders for trusting our genetics.

The Northern Beef Week 2022

This year we at Boambee Angus are getting involved with The Land Newspaper and joining their Northern Beef Week in June.

We will showcase some of our yearling bulls and females from some exciting new sire lines including Ben Nevis Newsflash N239, Baldrige Command C036, Musgrave Avenger, Sugarloaf Harvester N169 and Knowla Navigator N206 to name a few.

Also on display will be some of our young sires, along with a good display of our exceptional female lines.

The gates will be open on **Saturday 25th June 2022** at:
Boambee Angus
‘Sinclair’s Point’
248 East Seaham Road
East Seaham NSW 2324

Come along and join us. We look forward to seeing you on farm!

Give us a call to discuss your requirements
