Additional Performance Credit Calculations and Supplemental Information

Describe below the progress made in meeting your program year work plan inspection goals. You must provide quantitative results for each compliance inspection and land application goal listed in your work plan.

According to our Work Plan, 29 sites were required to be inspected in the year 2025. We inspected a total 30 sites. Our inspection strategy criteria was to conduct compliance inspections at existing sites that have not had an inspection nor registered within the last four year window. All of the inspected sites are considered high risk/high priority sites. We also inspect those sites that have submitted permit applications proposing construction or expansion to ensure that the appropriate permit is issued. This year, we has 2 CSF permits in which we conducted construction inspections on both sites. However, the inspections were not logged into TEMPO.
