ABOUT US

COMPANY PROFILE

1993

Founded In

2007

Establishment

Shenzhen H-one

H-one built in 1993 which named Jinqi at first,
it focused on Mold and structure design.

Our current boss Mr.Ben Guo took over the company
and renamed "H-one" in 2007.

Mr.Ben Guo specilizes in electronic design so the
company turned to new step: finished product design,
manufacture and sale.

Core values

Execute Hard

Improve Fast

COMPANY PROFILE

We know Heat and control it to what you want

We are committed to empowering our customers
with a competitive edge-not just through
exceptional pricing, but through superior quality
and outstanding performance.

We understand the science of heat and master
its control, delivering precise results exactly as
you desire.

Our goal is to offer more than just convenience;
we aim to bring the true joy of cooking, enhanced
by the innovation and precision that technology
provides.

SYSTEM: INDUCTION HEATING

H-one induction heating technology development

What is core for an Induction Cooker?

Not Production ability, Not Supply Chain, It's control system.

Normally, we already know there is 3 main control systems for Induction cooker: single ending drive system, half bridge drive system, full bridge drive system. The single ending drive system is wide used in most induction cooker now, they called "Basic Models". If you need higher power output, the half bridge system may be your first choice. About full bridge system it is very similar as half bridge system, most time it was applied in industrial field.

1st Generation

2nd Generation

3rd Generation

4th Generation

H-ONE STARTED INDUCTION HEATING RESEARCHING FROM 2007.

AFTER PLENTY EXPERIENCE AND COST, HALF BRIDGE DRIVE SYSTEM IS IN OUR HAND

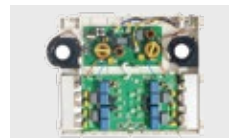

H-ONE INDUCTION CONTROL SYSTEM MODEL

HALF BRIDGE ONE BURNER MAIN BOARD

HALF BRIDGE TWO BURNER MAIN BOARD

HALF BRIDGE 3/4 BURNER MAIN BOARD

BASIC ONE BURNER MAIN BOARD

BASIC TWO BURNER MAIN BOARD

SINGLE SWITCH ONE BURNER MODULE

H-ONE INDUCTION COOKER PLASTIC BOTTOM CASE

TWO BURNER PLASTIC BOTTOM CASE
Solid structure / Lightweight material / Same quality

FOUR BURNER PLASTIC BOTTOM CASE
SINGLE POLARITY INDEPENDENT MOVEMENT

SYSTEM: INFRARED HEATING

■ CERAMIC HOB CONTROL SYSTEM INTRODUCE

Infrared Heating is used in Ceramic hob or called Hi-Light Cooker products.

It looks like Induction cookers when it doesn't work, but the inside is different a lot, for ceramic hob heats from electrical hotplate which generate heat from electrical resistance, so a good ceramic hob must have superior heat isolation. To fully use our electronic design advantage and be different from traditional products, we choose thermocouple to detect temperature and relay for switch to control the temperature, this design can control temperature more precise, more flex and cost lower. Additional our sensor touch display board, the electronic control totally instead of mechanical control.

FOUR BASIC FEATURES OF H-ONE'S INFRARED PRODUCTS

- 01 - SUPERIOR

HEAT ISOLATION

- 02 - MAINBOARD

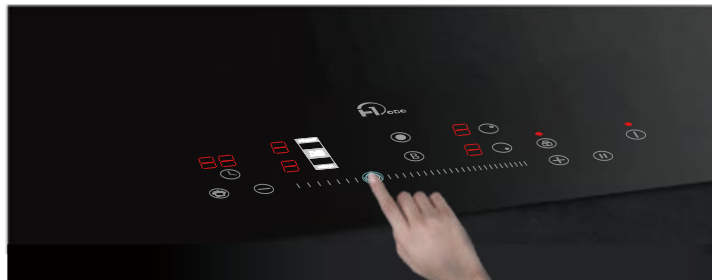

STANDARD CONTROL

- 03- ELECTRONIC

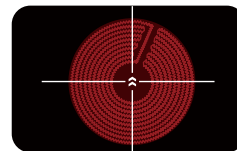

CONTROL INSTEAD OF
MECHANICAL CONTROL

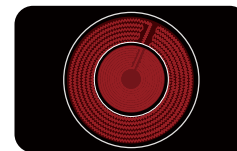

-SENSOR TOUCH CONTROL-
INSTEAD OF KNOB CONTROL

■ BEING COMPATIBLE CREATES MORE POSSIBILITIES

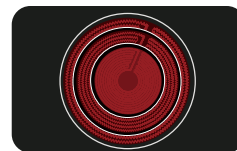

Single ring

-INNER RING-

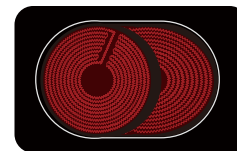

Double rings

-OUTER RING-

Triple rings

-COMPLETE RING-

Other shape

-DIFFERENT SHAPES-

Ceramic hob can fit to different pots and pans ,
high power heating speed adopts infrared heating principle.

CREATES MORE POSSIBILITIES:

STAINLESS STEEL

CLAYPOT

GLASS

STEAMER

MULTI-TIERED POT

CONTROL: DISPLAY AND FUNCTIONS

- FREE TO SET THE OUT PUT POWER QUICKLY -

No matter you want to 0-9 levels, 0-20 levels or 0-100 levels, the slider always respond immediately in right positions.

- HIDDEN TOUCH, INVISIBLE DESIGN -

The button with light, when you turn off, the display zone is invisible, new generation display control.

- SMART COOKING -

If you like cooking, the smart cooking display can help you to make many unique recipes and you can control by your phone, more convenient!

- WIFI CONTROL -

Download Tuya App, Connect the device with your smart phone, check the cooking process at your phone.

ONE-TOUCH FUNCTIONS

ONE-TOUCH FUNCTIONS IS MORE PRECISE IN TEMPERATURE

HERE WE OFFER 10 ONE-TOUCH FUNCTIONS, MORE NEW FUNCTIONS WILL LAUNCH ONCE READY.

DEFROST: Quickly deice the food which is taken out of fridge

MILK: Your first cup of milk in the morning cannot be cold and overheated

WARMER: If you are busy and forget to Eat, it will not forget to keep food warm

EGGS: Which type of eggs do you like, soft-boiled or hard-boiled?

PAN FRYING: Less oil, right temperature, suitable for most food like fish, chicken And steak.

DEEP FRYING: Show your children the perfect french fries

RICE: Your new rice cooker

STEW: For soups lovers

SLOW COOK: Slow cook+pan frying, a perfect steak

BOILING: Fast prepare hot water

Gradual LED lamp

Knob Control ,for 2 burners

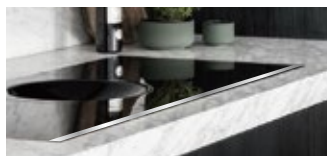

SURFACE: OPTIONAL FEATURES

- The beveled edge makes built-in products fit better on cabinet easy to clean

- The wrapping edge can protect the glass and extend the product's lifetime

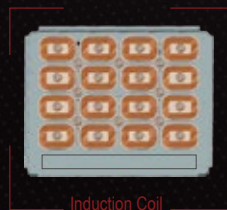

- We built the r&d team and focused on heating technology researching for home appliances. Hair straightener is the first hot sale product, then H-one sets its core goal: induction heating innovation. We study, we collect, we listen and dedicated to half-bridge technology developing. Thanks to this insistence, we built our own induction heating system and send our h-one inside products to all over the world.
- When one project comes to an end, the products launch in market, another new project will start. Now H-one have 5 main product series: induction cooker (induction heating), ceramic hob (infrared heating), sous vide (PTC heating), hair straightener (M-CH/PTC heating) and a new filed curtain motor (motor drive).
- As a ODM supplier, to keep our products always be competitive and functional, H-one never stop researching and work closely with our business partners, try to better understand the special and useful requirements in the market.
- Welcome all of you to H-one and share your ideas, we can make your designs come true.
