

If the bottle has one line on it, fill to between the line and the shoulder of the bottle.

If the bottle has two lines on it, fill between the two lines.

Reminder: Do NOT over fill your Fecal coliform/Total coliform bottles. Please see the references above or call the lab if you need clarification.

If a Fecal coliform or Total Coliform bottle is overfilled, it could be subject to rejection of the sample or the result qualified.
