## [UN]NATURAL

Gallery Space 2

Exhibition Dates: May 5 - 26 2018

*[Un] Natural* is a mixed media exploration of Naiads, Dryads and Nereids from Greek and Roman mythology using augmented Reality, 3D modelling and neural networks to create modern interpretations of classical creatures of nature. Mythology has long been a subject for painters and sculptors with a classical bent and the anthropomorphization of environmental concerns assists with the empathy towards the environment and its needs. By using machine learning and augmented reality through a mobile application interface, J grants the viewer an insight into a computers empathic reaction to our environment.
