

"Addiction- When you can give something up anytime, as long as it's next Tuesday."

"Depression- When everything you laugh at is miserable and you can't seem to stop."

- Nikki Sixx, The Heroin Diaries: A Year in the Life of a Shattered Rock Star

Palmetto Corner

Our mission is to provide clients with supportive counseling and other harm-reduction treatments. We want to help them break free of their addictions and develop a more positive way of thinking that sets them on a path towards healthier sober living.

Palmetto Corner is located in a quiet, safe and home-like setting to allow clients to focus on the beginning of their recovery journey. We believe in developing and practicing mindfulness techniques and routines to help maintain a successful recovery in addiction. Mindfulness also benefits clients who are dually-diagnosed with a mental illness in controlling its symptoms, such as anxiety and depression.

At Palmetto Corner, trained compassionate staff will assist clients through detox, develop individualized goals and plan steps that emphasize on each client's strengths, interests, and abilities, so they may live their best drug-free life.

Each Client will have an individualized discharge plan upon leaving our program, to put them in contact with needed community resources, housing, healthcare, etc. The discharge plan will further ensure each client has the tools needed to continue sobriety on their own.

Beautiful atmosphere for group and individual counseling, therapeutic activities, and community support groups
