

1992 Beneteau First 310, Tall Rig, Americas Cup Addition, Wing Keel (Shoal Draft).

The Beneteau First 310 is a popular, fast, family cruiser with a clear deck layout and has a comfortable living space featuring two cabins and a salon. The boat has a custom Sunbrella cover for storage with mast up or down.

She is a Great Lakes boat purchased in Ohio and trailered on a custom-built Aluminum trailer to Colorado for mountain lake sailing. The owner, a craftsman who took great pride in the condition of his boat and enjoyed working on the boat as much as sailing the boat, put her in his shop to customize and modernize all the systems.

This 30-year-old boat is virtually in new condition. A refrigerator and microwave were built in. An aluminum arch supporting high output solar panels, and davits to carry an inflatable dingy (not included) were fabricated and installed. Solar and shore charging systems with multiple batteries support all the boats systems. You will not find a better equipped or cosmetically perfect Beneteau on the water. There is a large array of sails... nearly new radial cuts to ok Dacron cruising sails.

The original Volvo diesel engine looks and runs like new and probably has been run less than 200 hours. This is an amazing boat that has been sailed very little and has been pampered by her skipper. He equipped this small racing/cruiser with all the features of a much larger yacht to make her comfortable and fast.

The boat followed its owner from Colorado to Hernando Beach Florida in 2020. The boat is now located in Hudson Florida and is docked at a friend of the owner, who cares for the boat as if it was his own. This boat is 30 years young and must be seen and sailed to truly appreciate her.

The boat comes with a custom-built dual axle, aluminum trailer that is also in excellent condition.

This unique First 310 with the 8900# GVW trailer is priced at \$45,000.
