

September Kayak : Coastal Cleanup

Our area of cleanup: Yellow Point and Cow Creek

The Team : Anne & Mitch Lairmore, Debbie Robinson , Linda Turley

The teamwork of Mitch and Debbie collected our first booty, foam out of a narrow mangrove:

Debbie found an old, gnarly visor to add to our collection.

We each attempted to get a 5 gallon, half full of mud bucket off of the bottom, but we found that Kayaks are not the best boats to lift heavy objects out of the water. Luckily no one got wet in the attempts, but we decided it was best to move on...

And that is when we found this treasure, an old dock foam piece:

It definitely needed teamwork to take this home. Mitch towed Anne, who paddled with the rope from the foam tied around her kayak while Linda and Debbie took turns pushing from behind.

All in all a successful and fun morning helping to keep our waters clean!

Cheers!
Anne Lairmore
