

## EPD certification for ELKA barriers

### Series PARKING and INDUSTRIAL - series S

#### ELKA barriers series PARKING and INDUSTRIAL - series S have received EPD certification

The EPD (Environmental Product Declaration) certification is a verified report that describes comparable information on the environmental impact of our products throughout their entire life cycle.

For us as a family business, the information and transparency of the certificates are an important milestone towards sustainability and responsibility towards future generations.

The EPD certificates are also linked to our BIM objects. This allows us to support architects and planners in the implementation of their projects (e.g. in the creation of CO<sub>2</sub> calculations).
