

**JASON**  
HYDROTHERAPY®

Innovating Hydrotherapy Since 1982.

Since 1982, we at Jason International, Inc. have been proud to share our family's passion of Better Living through Bathing. This is reflected throughout our rich history, the longevity of our products, and our dedication to quality.

We were founded to fulfill my dreams of developing premium hydrotherapy products. Now together with my sons, we continue the legacy of excellence. Ingrained with an innovative spirit, we are dedicated to making lives healthier by bringing you the benefits of bathing.

Since our company's inception we have stressed innovation with the belief that "success is in the details." Our company is steeped in a tradition of hydrotherapy firsts. With inspiration and engineering excellence, we have developed technologies such as: Ergospatial™ Design, Quiet Design™ Engineering and Sani-Design™, our revolutionary patented MicroSilk® hydrotherapy, and many more.

With our customers in mind, we have redefined the industry standards through meticulous craftsmanship and tireless engineering supported by our devoted belief in the many ways hydrotherapies can enhance your home and your health. Thank you for considering Jason as part of your daily life.

To Your Health,

A handwritten signature in black ink that reads "Remo Jacuzzi".

Remo Jacuzzi  
Founder

Paulo Jacuzzi, Remo C. Jacuzzi, and Remo V. Jacuzzi

## Our Unique Heritage

*"For me, a Jacuzzi is not a machine. It's a person — a member of my family."*

The name Jason is a contraction of the words "Jacuzzi" and "son" to form "Jason." The Jason brand is not to be confused with the brand of another manufacturer by the name Jacuzzi. The Jacuzzi Company and name were sold by the descendants of the original Jacuzzi Family in 1979.

In 1907, my father, Valeriano Jacuzzi, and a younger brother started the eventual immigration of his parents, brothers and sisters to the United States from Italy, where they settled in Northern California. My uncle Rachele, a brilliant self-taught engineer, designed and built a new type of highly efficient airplane propeller for WWI which led to the establishment of the Jacuzzi Bros. Company. The family company became a leader in the aviation industry when they built the first enclosed monoplane in the United States. After the loss of a brother in a plane fatality, the brothers refocused their passion into the design and manufacture of their patented deep-well injector pumps.

In the 1940s, my cousin was diagnosed with severe rheumatoid arthritis. His father, my Uncle Candido, observed the benefit from the hydrotherapy treatments his son received at a hospital. He and a team of company engineers built a patented hydrotherapy unit that could operate in home bathtubs, launching the hydrotherapy industry.

I began working in the family business while still in college, earning degrees in mechanical engineering and business administration. Eventually, I became president of Jacuzzi-Brazil. In 1980, after the Jacuzzi

family sold the business and the name to a large corporate conglomerate, I became president of Jacuzzi Brothers until 1982, when I decided to return to the values and philosophy developed in the original family business and founded Jason International, Inc.

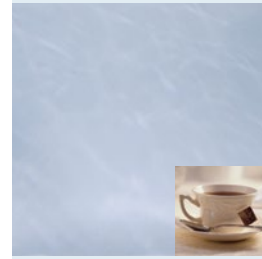

Today, Jason International remains the industry leader of cutting edge hydrotherapy bathing technology and product design continuing our legacy of establishing new levels of excellence for those whose lives are improved by our products. *—Remo Jacuzzi, Founder*

# The Science of Hydrotherapy

Understanding how we're "wired" can help you see how hydrotherapy works, and the benefits of each type. Four important nerve receptors in the body (contact, temperature, light touch and pressure receptors) send messages to your brain, which stimulate physical reactions and contribute to wellness and relaxation.

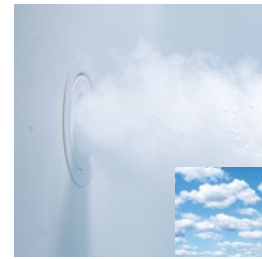

## Ⓢ Soaking Hydrotherapy

Like a cup of hot tea, a soaking bath is generally relaxing. Submerging in warm water hydrates the skin, making it feel softer. Soaking hydrotherapy also stimulates your skin's contact and temperature receptors to promote relaxation, increase circulation and open pores to release toxins.

Soaking Hydrotherapy stimulates the contact and temperature receptors located on the surface of your skin, which promotes relaxation, stress relief, natural cardiovascular exercise and increased circulation.

Ⓢ Soaking Hydrotherapy  
Stimulates contact and temperature receptors

## Ⓜ MicroSilk® Hydrotherapy

Feel as light as a cloud when billions of tiny bubbles form a milky, oxygen-rich bath which gives your skin new life. Jason's patented MicroSilk system supersaturates the water with negatively charged, oxygen-rich bubbles through a strategically placed delivery port, increasing oxygen levels up to 70 percent higher than common tap water, which promotes healthy skin cell growth, neutralizes free radicals and encourages healing of scar tissue formation.

MicroSilk® Hydrotherapy creates oxygen-rich microbubbles which reach gently into pores, increasing the skin's metabolism while promoting skin cell growth and reducing fine lines, wrinkles and scar formation. Research has also indicated that oxygen aids in increasing collagen production.

Ⓜ MicroSilk® Hydrotherapy  
Stimulates healthy skin cell growth by improving the skin's metabolism

## ⓐ AirMasseur® Hydrotherapy

Imagine relaxing in a bath of bubbly champagne. Millions of warm air bubbles from strategically spaced air jets create a blanket of rolling movement, gently massaging your skin. Like a soothing caress, AirMasseur hydrotherapy delivers all of the benefits of Soaking hydrotherapy while also stimulating the skin's light-touch receptors, enhancing your sense of calm and relaxation. The feathery touches reach just below the skin's surface for a delicate, full-body massage.

AirMasseur® Hydrotherapy engages the light-touch receptors just below the surface of the skin and promotes further calming, relaxation and circulation.

ⓐ AirMasseur® Hydrotherapy  
Stimulates light-touch receptors

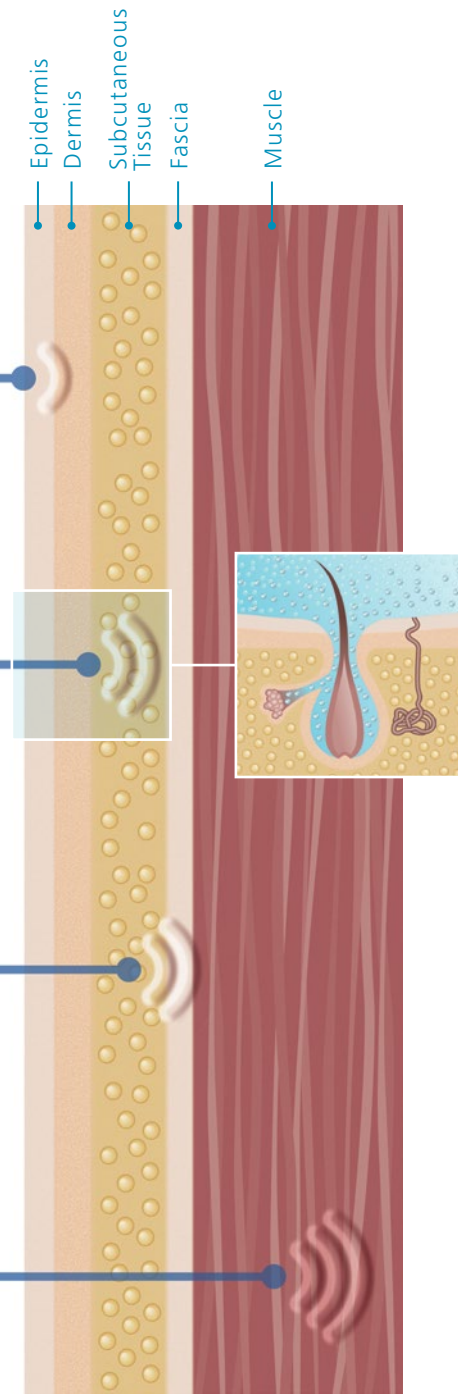

## Ⓦ Whirlpool Hydrotherapy

Like an invigorating massage, air bubbles enter the bath through strategically spaced jets and stimulate the surface receptors on the skin. The strong, rolling water flow and the comfort of heat contribute to an overall feeling of relaxation and decreased muscle tension. The bubbles reach below the surface of your skin for a full-body massage. Jason's Perfect Pressure / Perfect Flow jets are strategically located and directed at the key muscle groups vulnerable to stress, soreness and "guarding," allowing them to relax and rejuvenate.

Whirlpool Hydrotherapy brings about true physiological change in your body by engaging the pressure receptors located deeper in the muscle's tissue. This relieves tight and stressed muscles while promoting tissue rejuvenation and joint flexibility.

Ⓦ Whirlpool Hydrotherapy  
Stimulates pressure receptors

Skin & Muscle Tissue

## Combined Pleasure

Jason hydrotherapies are also available in three wonderful combinations, giving you a choice of hydrotherapy in one bath.

### Ⓜⓐ MicroSilk®-AirMasseur® Hydrotherapy

A combination bath that delivers the benefits of both the new skin-rejuvenating technology—MicroSilk®—and AirMasseur® hydrotherapy, which stimulates the body's light-touch receptors.

### ⓂⓌ MicroSilk®-Whirlpool Hydrotherapy

Combines the skin-cleansing and healthy benefits of MicroSilk® and its oxygen-rich microbubbles with the more traditional whirlpool technology that provides deep, relaxing massage to your muscles.

### ⓐⓌ AirMasseur®-Whirlpool Hydrotherapy

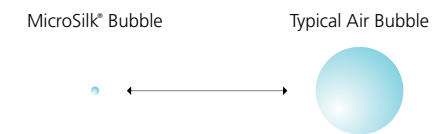

Allows for stimulation of both light-touch and pressure receptors through the combination of our AirMasseur® technology and Whirlpool Hydrotherapy. It's the bathing equivalent of both Swedish and deep-tissue massage.

# MICROSILK BY JASON

It's all about the bubbles — and ours work overtime. The patented MicroSilk technology creates billions of these little wonders, which form a cloud of oxygen in your bath giving you a relaxing, effervescent sensation with amazing benefits.

## Like a facial for your entire body

MicroSilk bubbles penetrate gently into your pores for deeper cleansing — without a need for soaps or chemicals — while moisturizing and plumping your skin to reduce fine lines and wrinkles. The negatively charged, oxygen-rich bubbles increase the skin's metabolism, promote healthy skin cell growth, neutralize free radicals and encourage healing of scar tissue formation. A MicroSilk bath gives your skin new life and leaves it feeling luxuriously silky.

## The positives of negatively charged ions

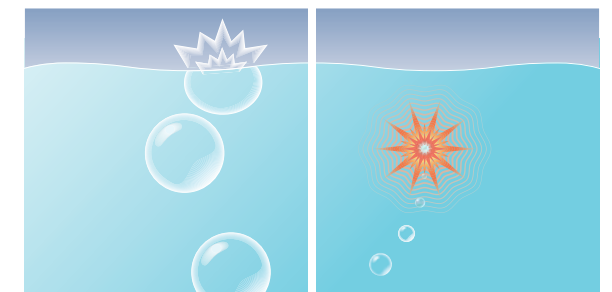

Microbubbles enhance feelings of well-being by infusing the water and the air around the bath with therapeutic levels of negatively charged ions. Negative ions are known to improve serotonin levels in the brain, promoting relaxation, deeper sleep and quicker recovery from physical exhaustion.

## Up to 70% more oxygen

The oxygen-rich microbubbles supersaturate the water of a MicroSilk bath, increasing oxygen levels up to 70 percent higher than common tap water. This increased oxygen level energizes cells, stimulates the immune system, kills bacteria and promotes healing.

## Easy on the environment

When the microbubbles collapse in the water, their heat energy is released, increasing your skin temperature evenly, without the need to add more hot water. By maintaining the warm temperature of the bathwater, the dissolving microbubbles save water and energy, which is good for you and the environment.

Larger air bubbles burst at the surface, while MicroSilk microbubbles collapse, releasing heat energy and life-giving oxygen into the water.

Model is shown using the optional MicroSilk® Shower Wand (see page 41)

For more information and testimonials, visit [microsilksilk.com/testimonials](https://microsilksilk.com/testimonials).

## The Benefits of MicroSilk® Hydrotherapy Include:

### 💧 Oxygen Rich for Your Health

- Increases oxygen levels in the bath – up to 70%
- Naturally reduces anaerobic pathogens and bacteria on contact
- Promotes healing and increases skin metabolism
- Stimulates the immune system
- Enhances skin cell growth and collagen production
- Reduces formation of scar tissue

### 💧 Negative Ion Therapy

- Releases therapeutic levels of anions
- Improves serotonin levels for sense of well-being
- Neutralizes free radicals
- Relaxes mind and body

### 💧 Cleanse and Moisturize

- Deeper cleansing of the pores
- Exfoliates and softens skin
- Plumps and hydrates skin
- Reduces fine lines and wrinkles
- Improves skin tone and reduces redness
- Relieves symptoms of eczema and psoriasis
- Reduces irritation and helps prevent infection

### 💧 Consistent Warmth

- Collapsing microbubbles release energy as heat
- Enhanced “sauna effect” aids in detoxification
- Pores open readily to release toxins and receive and retain moisture

## Optimize Your Hydrotherapy

Jason’s hydrotherapy experts are masters at combining the art of luxurious relaxation, advanced technical engineering and in-depth knowledge of the science of hydrotherapy. Each Jason hydrotherapy product offers a unique range of benefits to meet your health, beauty, and wellness needs.

## A Sensory Experience

### Sound

Our Bluetooth Sound Immersion System transforms your bath shell into a speaker, placing you literally in the music.

### Sight

Color can impact your mood, energy level and well-being. Chromatherapy is the practice of combining color and light to relax or invigorate your state of mind. With Jason’s digitally controlled LED chromatherapy lighting system, you can enjoy a single hue or soothing cycle of color and light.

## Your Body Is the Most Amazing Machine Ever Created; We Simply Help with the Scheduled Maintenance

Your body is a highly functioning machine, enduring mental and physical stress, fighting disease, and moving from place to place. Restoring your body to prime operation is a priority—a necessity. Jason hydrotherapy baths naturally restore your body and mind to wellness and balance in a simple 20-minute bath cycle. No additives, no prescriptions, no appointments, just air, water and you, in perfect relaxation. The chart below identifies specific qualities to help you tailor your optimal bathing experience.

# Why a Jason Bathing Experience Surpasses All Others

Each Jason bath is the product of a proud heritage, continual innovation and an understanding of your Daily Cycle of Living. The Jason hydrotherapy experience enhances the natural healing processes of this daily cycle. The experience makes you comfortable, engages your senses and delivers peace and quiet while providing a clean bathing environment.

## Comfort

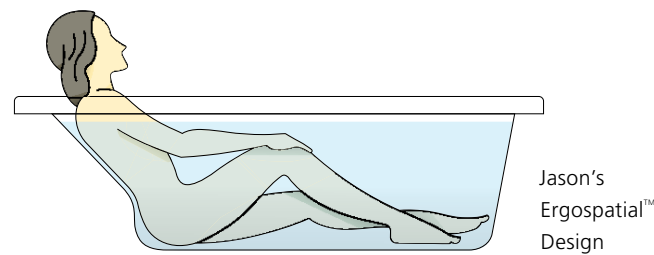

A Jason bath is a luxurious revolution, in part because we fit baths to bodies. Designed for comfort and maximum hydrotherapy benefit, Jason baths combine perfect body positioning, optimum well depth and strategic jet placement. Attention to these details is what makes a Jason bath the perfect choice.

### Designed for Comfort

Jason baths combine perfect body positioning, optimum well depth and strategic jet placement. Each bath incorporates our Ergospacial™ Design to cradle your body in a position of greatest comfort. Ninety percent of all bodies fit within a specific height range from the neck to the tailbone to the feet. It's called the 90 percent rule and we use it when designing baths. We place a "lumbar support" at the ideal height to release pressure on your lower back and slant the backrest at angles that provide maximum comfort while minimizing pressure on any particular joint.

### Perfect Positioning

The proper positioning of the body is critical to receiving the maximum benefits of hydrotherapy. Jason's Ergospacial™ Design places your body in its optimal resting, or "loose-pack" position, helping you achieve full relaxation and hydrotherapy benefit.

Jason's Ergospacial™ Design

## Perfect Size, Perfect Depth, Perfect Placement

Jason baths come in a variety of lengths and widths to fit you and your space perfectly. Our spacious bathing wells are the right depth for your body to enjoy full submergence in the water. The correct depth also maintains the ease with which you can enter and exit the bath. Air and water jets are optimally placed in anatomically strategic locations within the vessel for maximum comfort and hydromassage effectiveness.

## Quiet

Jason manufactures the quietest baths on the market. Our Quiet Design™ technology reduces and dissipates sound to ensure your peaceful bathing experience. Silent air controls, quieter jets and our thoughtfully engineered plumbing systems reduce noise. In addition, Jason pumps and air blowers are mounted separately from the bath, minimizing vibration and sound.

Jason's patented Level-Form™ base

Our patented Level-Form™ base absorbs sound and vibration, provides rigid support across the entire floor of the bath, insulates against heat loss and simplifies installation.

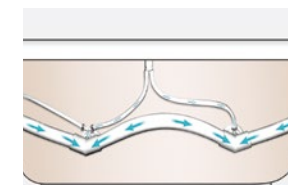

## Clean

Our groundbreaking Sani-Design® Technology incorporates a full spectrum of purity-enhancing components.

### Automatic Ozone Sanitation System

Jason's maintenance-free ozone antimicrobial system works automatically with MicroSilk®, AirMasseur® and Whirlpool hydrotherapies to destroy bacteria, viruses and fungi.

### V-Drain™ Antimicrobial Plumbing System

Jason's V-Drain™ Plumbing System

This innovative whirlpool jet system ensures maximum water drainage from the antimicrobial plumbing system after use. It prevents water from both pooling and collecting in plumbing systems.

### Positive Drain AirMasseur® Channel

Jason's Positive Drain AirMasseur® Channel

Engineered to maintain a downward drain angle, this system ensures maximum water drainage from the hydrophobic air channel after each use.

### Automatic AirMasseur® Channel Drying System

This system automatically starts after an AirMasseur®, MicroSilk®-AirMasseur® or Air-Whirlpool bath has drained, purging water and drying the air channels, eliminating moisture.

## Five Beautiful Collections

**CARRERA® COLLECTION**

Value Priced, Jason Quality  
(page 36)

## Carrera® Collection Solid Surface Artistic Statements

A unique new method of production liberates Carrera® from the form restrictions associated with other bath materials. The warm white Carrera® has the look and feel of natural stone. The collection is cultured and urbane, and yet has an unmistakable hint of the outdoors. The baths, each with available coordinating lavatories are elegant in their grace and simplicity. They are functional works of art.

### Baths

**CB553P** 66 x 36 x 30 / 24" (168 x 91 x 76 / 61 cm)

**CR553P** 66 x 36 x 24" (168 x 91 x 61 cm) 

Overflow drain is integral

#### THE DESIGNER

Los Angeles-based designer Shawn-Ian Bruce has emerged as one of the leading innovators in product and interior design, furniture and fine art. Marked by a clean, functional style and fresh point of view, Shawn's inspiring contributions to the Carrera Collection include the CB553P and CR553P baths, as well as the coordinating lavatories.

Carrera® CB553P Soaking bath, a true work of art. Featured in the Pasadena Museum of California Art 2007 California Design Biennial.

### Lavatories

## forma® Collection Bold, Modern and Minimalist

The forma® Collection embraces minimalism. Celebrating the beauty of visual purity with clean lines and bold shapes, forma® merges the contemporary with the comfortable, the modern with the masterful. The forma® Collection commands its space while reveling in an elegantly simple existence. It plays with light and shadow, and needs no ornamentation.

In this serene environment, you can relax and find tranquility. You may find, like many others, that color or sound enhances the experience. Jason provides options such as Thermo Comfort, Chromatherapy, Bluetooth Sound Immersion and Automatic Ozone systems. Available in Standard, Premier and Signature packages.

Select the hydrotherapy that best suit your needs: Soaking, MicroSilk®, AirMasseur® or Whirlpool. Also available in combination hydrotherapies including: MicroSilk®-AirMasseur®, MicroSilk®-Whirlpool and Air-Whirlpool.

The forma® Collection's minimalist sophistication, peerless engineering and multitude of options create the consummate minimalist luxury bath — an impeccable blend of form and function.

## Integrity® Collection Value Priced, Jason Quality

With the Jason Integrity® Collection, builders and remodelers get Jason quality at an exceptional value. Now Integrity® makes the amazing health and wellness benefits of MicroSilk® technology available to a broader base of customers. Soaking, AirMasseur® and Whirlpool baths are also available in select colors, shapes and sizes. All come with our Level-Form™ base, which is pre-leveled, easy to install and requires no grouting.

When it comes to engineering and craftsmanship, the Integrity® Collection is Jason through and through. Integrity® AirMasseur® baths include a high-quality air blower for quiet maintenance-free operation. Integrity® Whirlpool baths feature direction and flow-adjustable hydrotherapy jets. The single-speed whirlpool pump delivers quiet operation and long life. Integrity® MicroSilk® baths offer our exclusive skin-rejuvenating technology more affordably than ever before. All three models have an integrated air switch for easy fingertip operation.

MicroSilk® Shower Wand

MicroSilk® Shower Wand for use with MicroSilk® Hydrotherapy Baths

The MicroSilk® Shower Wand & Hose Assembly is designed as an accessory to your MicroSilk® Bath. It expands the benefits of MicroSilk® Therapy even more by allowing direct contact with the bather's face, scalp and upper body.

AWARD WINNER

## Vivere® Accessible Bases

Our Zero Threshold TZ3260 shower bases offer accessible luxury and functionality and are a perfect fit for those “aging in place.” The included stainless steel linear drain accommodates a standard 2" shower drain connection.

### ZERO THRESHOLD SHOWER BASES

TZ3260 60 x 32 x 20" (152 x 81 x 51 cm)

TZ3260 SEAT LEFT/SEAT RIGHT 60 x 32 x 20" (152 x 81 x 51 cm)

Seat right shown

## Alexia™ Shower Bath

Jason's Alexia™ AL3648 shower bath combines a shower base and a small bath with seat. It has a built-in tile lip on three sides and an integral lateral skirt, making it ideal for an alcove installation.

ALEXIA™

AL3648 SHOWER BATH 48 x 36 x 12" (122 x 91 x 30 cm)

## Shower Bases

All Jason acrylic shower bases feature our patented Level-Form™ base that provides rigid support across the entire floor of the base, insulates against heat loss and simplifies installation.

### NEO-ANGLE CORNER SHOWER BASES

SB4848N 48 x 48 x 6" (122 x 122 x 15 cm)

# Optional Equipment

## JETTED NECK PILLOW

Available on Designer and forma® Whirlpool and Whirlpool Combination baths. This snap-on foam pillow fully supports the bather's head and neck while two pulsating jets provide a gentle neck hydromassage. Constructed of waterproof and mildew-resistant materials. Offered in black or white.

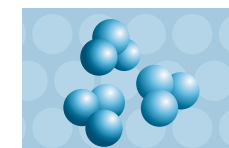

## BLUETOOTH SOUND IMMERSION SPEAKER SYSTEM

Sound-transducing speakers provide sound from your choice of Bluetooth devices through the shell of the bath. A pair of transducers are pre-attached to the bath and provided with a Bluetooth amplifier. Provided as standard equipment on all signature series baths.

## THERMO COMFORT SURFACE HEATER

Our heated back rest is designed to pre-warm your bath and rid it of uncomfortable cold spots. Using low-voltage technology, the shell heats up as the bath fills and will be warm above and below the water line.

## AUTOMATIC OZONE SYSTEM

Automatically protects your system bath while equipment is operating. Ozone guards your bath from bacteria, viruses, etc. Ozone is safe, will not irritate and leaves no residue. Jason's ozone generator has a 9,000-hour operating life. (Included on forma® and Designer Premier and Signature Edition baths; and all Vivere® system baths.) Available on Integrity® Whirlpool baths.

## LED CHROMATHERAPY LIGHT KIT

Provides an assortment of preprogrammed light shows that include color washes, cross fades and fixed colors. Estimated service life of 100,000 elapsed-time hours under normal operating conditions. (Included on forma® and Designer Premier and Signature Edition baths, and all Vivere® system baths.)

## COMBINATION PUMP HEATER

Heat energy generated by this whisper-quiet pump is released into the water, maintaining the water temperature while the pump is working and eliminating the need for a supplemental heater. No additional power supply is required, making it great for remodel projects. (Included on Vivere® Collection Whirlpool and MicroSilk-Whirlpool baths.)

# Acrylic Color Chart

## forma®, Designer and Integrity® Collections

### STANDARD COLORS

### CUSTOM COLOR INSTRUCTIONS

forma® and Designer bath products are available in custom colors on demand. If you have a special request, please give us a call. Colors are subject to availability from our partners.

### WHIRLPOOL BATH HEATER

Automatically maintains water temperature while your whirlpool is in operation. (Included on forma® and Designer Premier and Signature Edition Whirlpool, MicroSilk-Whirlpool, and Air Whirlpool baths.) Available on Integrity® Whirlpool baths.

Designer ES553 Air-Whirlpool bath with jetted neck pillow (see page 31)

Sculptural beauty, advanced technology and unsurpassed comfort combine to create the ultimate bathing experience.
