

We're helping

outdoor cats!

Here's How You Can Help, Too!

Contact Info:

**will humanely trap, neuter and return
community cats in your neighborhood on**

Date:

Trap-Neuter-Return (TNR) benefits the cats and the neighborhood. Community cats - also known as ferals - are going to be spayed or neutered, vaccinated, and ear-tipped (the universal symbol of a neutered and vaccinated cat). Back in their outdoor home, they will not reproduce - no more kittens! TNR improves their lives and yours. It is effective and humane. Other approaches for community cats just don't work.

You can help make this a success!

- **Keep your pet cats inside** on the above date (so they won't accidentally be trapped).
- **Contact us if you are feeding any cats** in the neighborhood or surrounding area. The more we know about where the cats eat & spend their time, the more successful we'll be.
- **Don't feed the outdoor cats on the day before trapping** (always continue to provide water). Community cats will enter traps only when they're hungry. Move your pet cat's feeding inside on the above date if you normally feed outside. Once this trapping day is over, you can go back to feeding the cats.

**Thank you! Your
cooperation is vital to
making your neighborhood
a better, safer, healthier
home for cats and people!**
