

Celebrating 10 YEARS

of overpopulation prevention with an exponential impact
for pets, families, and our community!

On January 30, 2017, Tails of Hope opened our doors
and Spayed/Neutered the first two cats and two dogs.
This chart represents one unspayed female, her unneutered male mate, and
all other offspring producing over the next six years.*

When you multiply these numbers by the anticipated 20,000** total number of cats & dogs Spayed/Neutered at Tails of Hope in our first 10 years from 2017-2026, this equates to over

1 BILLION

unwanted kitten & puppy births prevented!

*Source: North Shore Animal League.
This chart is based on theory and the actual numbers of the lives saved could be more or less.
**Estimate based on number of surgeries performed 2017-2025.
