

# HOW TO CALCULATE OUR IMPACT

Source: North Shore Animal League

**Spay/Neuter diverts entry into shelters and pet homelessness while keeping families together in exponential numbers.**

**By spaying/neutering one male and one female,**

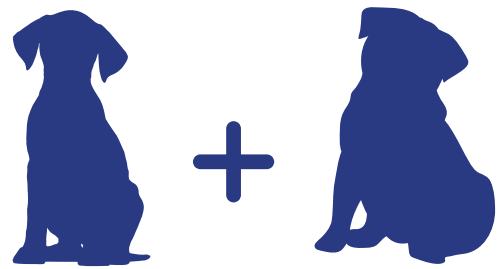

more than  
**2,000**

unwanted births can be prevented in just 4 years - that calculates to more than

**2 MILLION**

in 8 years!

more than  
**67,000**

unwanted births can be prevented in just 6 years!

**In addition to unwanted births, other benefits contribute to these results, such as:**

-  Pets living healthier lives
-  Pets less likely to be aggressive
-  Reducing or eliminating unwanted pet behaviors
-  Pets less likely to roam, run away, or get lost
-  Pets more likely to be calm and affectionate
-  Highly cost-effective vs unwanted litters or treating cancers or other diseases
