The provider sent an email stating that he/she wanted to cancel the inspection and requested a rescheduled date. A call was placed on 07/31/2026 at 1:00 PM. The Administrator stated that he/she would not be available for the survey and there was no one else available to allow the surveyor access to the premises. As a result, the survey was aborted due to the agency's failure to allow access to the premises. The failure to allow reasonable and meaningful access to the provider's premises prohibits the regulatory authority to determine if the agency is operating properly within the parameters of Private Home Care Rules and Regulations. This can place staff and clients at risk of neglect, abuse or injury.
