Systematic Energy Diversified Program

INVESTMENT OBJECTIVE & STRATEGY

Cayler Capital LLC (CCL) is a quantamental energy program that seeks to deliver growth, diversification, and preserve capital in the oil market via systematic discipline with fundamental analysis. CCL is focused on trading futures and options in the WTI, Brent, Gasoline, and Heating Oil markets.

CCL utilizes over 1,000 fundamental data points (see algorithm inputs below) and systematizes the art of fundamental trading. The strategy has six algorithms that focus on global fundamentals in the energy market with inputs of refinery production models, physical oil movements around the world, field level oil production, demand forecasts, refinery turnarounds, and the term structure in the market.

KEY REASONS TO INVEST

- Six siloed algorithms offer diversification and uncorrelated investing within the portfolio
- Niche strategy – under-invested opportunity for most investors
- Uncorrelated to S&P 500 – (0.20) and HFR Macro CTA Index 0.01
- Daily liquidity – No lockup period and High-Water mark
- Low margin requirements – Average margin usage is under 10%
- Strong alignment of interests – Significant capital invested by the principal
- Diversification – 70% of VaR is relative value based with gasoline and heating oil cracks
