

Light Reflecting Material Program

Policy #2 - Eligible Applicants

Endorsed by Program Policy Committee: July 18, 2019

1. Eligible applicants are the operator of the farmed property located in BC at which the material will primarily be used.
2. Eligible applicants must use best efforts and follow good horticultural practices to place the material on their crops.
3. To be eligible, growers must have the product inspected in place by a program inspector. Subsequent inspections may be carried out at the discretion of the program administrator.

Note: The inspector will contact the applicant to arrange an inspection. The inspection may take place after harvest and the materials can only be viewed in storage. Growers should take a photo of the materials in place to show the inspector. Photos will provide the inspector with evidence of usage.
