INFORMED CONSENT FOR TESTING PROCEDURE

Thermal imaging is a technology which measures the surface temperature of the body using infrared cameras and is analyzed to provide physiological information as an adjunct to standard screening and diagnostic testing. Initial _____

I understand that thermal imaging does not and cannot directly detect or be used to diagnose injury or disease of any kind and that the information is designed to be used with other examinations as an aid to the diagnostic process. Nor can it rule out the presence of injury or disease since some conditions do not produce sufficient temperature changes at the surface of the body to be seen with thermography. Therefore, injury or disease may still be present despite a lack of thermal findings present on examination. All concerns require evaluation by a doctor regardless of the thermal imaging results. Use of thermography as a stand-alone detection examination is not recommended as it can result in the failure of an existing condition to be detected. Initial _____

I further understand that not all organ systems, dental conditions, and medical conditions will produce thermal findings that will enable detection. Therefore I understand that this test cannot determine if an organ or the body is diseased or healthy and it cannot diagnose disease. It is a functional test which may provide general regions to evaluate more thoroughly by a health care provider. It cannot replace or rule out the need for examination or additional testing. Initial _____

I confirm that I have followed the written pre-examination protocols for thermal imaging provided to me before the examination. I understand that if I did not receive and follow these protocols, the accuracy of my examination may be compromised. Initial _____

By signing below, I hereby acknowledge that (1) I have read and understood each of the above paragraphs; (2) I have had an opportunity to ask any questions I may have had; (3) any questions I asked were answered to my satisfaction; (4) I have received sufficient information with respect to thermal imaging to make an informed decision to undergo the procedure; (5) I understand no guarantee or warranty is being made that all risk for current and/or future injury or disease will be detected; and (6) I hereby authorize and consent to thermal imaging.
