

Hi Robert,

November 26, 1996

I talked to you the other night after you were on the Art Bell show. I picked up your discussion about half way through the show and didn't get the right spelling of your name. I heard Art say Robert Seles. Forgive me if I mutilated it. I am a retired Boeing executive who worked in space and defense for close to 30 years. I was intimately involved with the team that was dispatched to investigate the anomaly of having 10 missiles go down at one time. I cover the incident in the enclosed book. I put a book mark where I talk about it. By the Way Timothy Good in, "Above Top Secret" also covers it briefly. I am in the ministry. My book was written from a Christian perspective as you will see. I had to go looking for answers to strange stories that people brought to me over the years and I had no answer for other to say I believe it was ungodly. I know it is not popular for some one in the ministry to talk about these things even today, however the time has come to stop walking in blindness and to tackle the issues of what may be happening to mankind.

If you desire any corroboration on the incident you talk about, I am not afraid to step up to the issue.

Sincerely

Bob Kaminski
