

Your Path to Better Health Starts With Research

Become a Research Associate with LifeX Research and get access to employee health benefits while contributing to wellness research.

Who is LifeX Research?

LifeX Research Corporation is a health data and research organization. LifeX collects and analyzes health data to advance longevity, healthy aging and overall wellness for everyone. Its mission is to improve health and reduce healthcare costs for the American workforce by proactively addressing conditions that lower quality of life.

What is a Research Associate?

Research Associates are part-time W-2 employees of LifeX Research who voluntarily take part in short health data collection activities, like surveys, wellness videos and logging vitals. As employees, they have access to the LifeX employee health benefit plan.

- Earn \$40 per hour for research activities (most take 15 minutes or less)
- 24/7 telemedicine, available day or night
- Predictive health analytics to help identify early signals of illness
- Employee health benefits designed to meet a variety of healthcare needs

Who is a good fit?

- Individuals who want to participate in wellness studies
- Individuals who don't qualify for ACA subsidies
- Uncovered partners of a Medicare recipient
- Individuals without access to benefits through their current employer

Your data, handled with care

All personally identifying information is removed before data is analyzed or shared. LifeX shares only population-level, anonymized insights with Research Partners. Individual data is never sold.

Better Health · Smarter Aging · Lower Costs
