INTERBROS directly contacts all potential markets in both North and South America, as well as the rest of the world with the support of our correspondent network in London and Continental Europe, in case it may be required.

INTERBROS studies all placement possibilities through different combination of structures, including Quota Share and Excess of Loss, to maximize results, by finding the right balance between the best Terms & Conditions available with the required capacity and price levels.

We do not only concentrate in accessing the specialized, traditional International Markets, but we also access domestic insurance carriers which underwrite multinational risks and provide good additional capacity with a high level of solvency.
