

Resident Guide – Approving visitor TCPR access with no parking payment needed

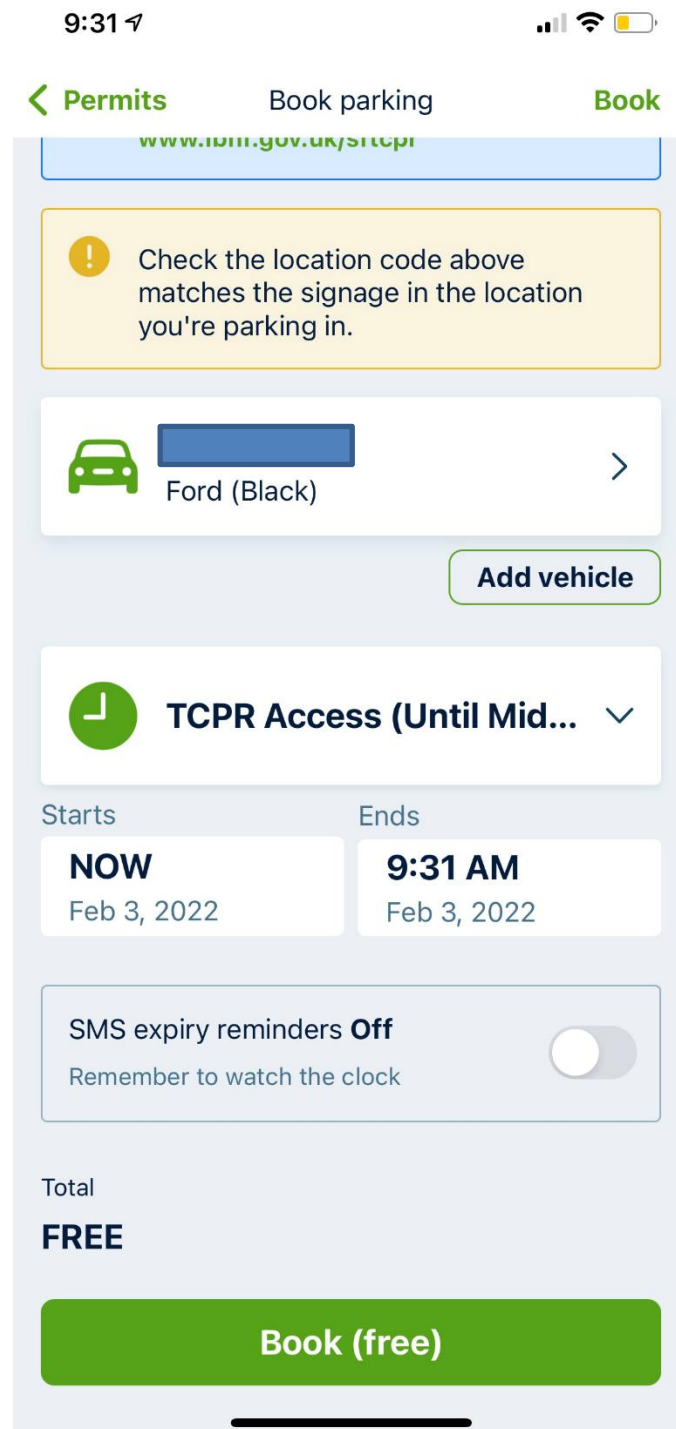

- When a resident has been approved for their visitor permit, they will now see a revised description on the app or web under **permits**, stating '*visitor parking, including TCPR access*'.

- There is a brief explanation of the scheme and instructions to give a visitor access through the cameras.

- When a user selects the *duration* button, they now get the 'TCPR Access (Until Midnight)' option second from the top, which has a £0 value. Select this option and press the *Book Free* button

- Once this session has been activated, the visitor has freedom to go through any of the TCPR cameras until 23:59 hours that evening. A new session will need to be activated if the visitor needs access the day after.
