

ODOUR-ZYME

*Biodegradable
Non-toxic, Non-pathogenic
Non-Polluting*

Odour-Zyme is a distinctive bio-enzymatic solution designed to eliminate odours at their source.

Odours can originate from a variety of sources, such as garbage, pets, perspiration, and food. While common deodorizers merely mask these odours, Odour-Zyme goes further. It features a pleasant apple fragrance that not only masks odours initially but also contains bacterial and enzymatic agents that actively attack and eliminate them. Once the fragrance dissipates, the odour source has been completely digested.

Applications:

- Removes urine from mattresses, carpeting, grout, furniture, and most porous surfaces.
- Eliminates odours in garbage chutes, bins, and drains.
- Deodorizes urinals and eliminates pet stains.

Availability
12 x 1 litre bottles
4x4 Litre jugs
20 litre pail
