

G T R

Grout and Tile Restorer
Deep penetrating formula lifts dirt and scale
From
Unsightly tiles and dirty grout lines

Many buildings feature ceramic tiles, quarry tiles, and other stone-type flooring surfaces. While these floors withstand heavy traffic and wear, the grout lines often suffer. Dirt that accumulates in grout lines is nearly impossible to remove with conventional cleaners and degreasers. G T R penetrates this stubborn soil and removes it from grout lines, restoring the grout to its original, attractive appearance.

G T R is a powerful, concentrated cleaner that combines several acids to remove dirt, grease, scale, lime, and other unsightly grime from stone floors and grout lines.

G T R is formulated to cling to both vertical and horizontal surfaces, making it an excellent cleaner for restoring grout lines on tile walls in public washrooms.

APPLICATIONS:

Quarry and ceramic tiles
Pool decks, sauna floors, whirlpools
Changing rooms, showers
Chrome ladders and fixtures
Drinking fountains
Porcelain sinks, toilets, and urinals

Availability
12x 1 litre bottles
4x4 litre jugs
20 litre pail
