

## Winter Rinse

**Winter Rinse** is a concentrated detergent to neutralize all salts etc... that accumulate during the winter. A cleaner with the ability to attack winter hazards, Eliminates corrosion of all salts when used regularly, also eliminates chemical attacks on floors. Helps to prevent corrosion of door pins, and metal thresholds of office entrances. Easy to use (mop on, mop off).

**Directions:** For routine uses add 1 part **winter rinse** to 40 parts water (25mL per litre of water). Mop daily. For heavy film add 1 **winter rinse** to 30 parts cool water (35 mL per litre of water).

Apply mixed solution liberally with mop; allow to soak for a few minutes. Wring out mop and pick up dissolved ice melt. Can also be used in automatic scrubbers.

For ice melt and rock salt stains in carpets add 1 part **winter rinse** to 30 parts carpet extractor rinse water (35 mL per litre if rinse water).
