

Koil Kleaner

Cooling Coil Cleaner Renovator

Description: Use Koil Kleaner as a cleaner and adhesive. It works fast to clean and leaves no residue to cut coil efficiency. It Is Ideal for restoring permanent-type filters to a like new filter. As a filter adhesive, it provides a mesh work of tackiness that entraps particles too small to be captured by the filter itself. This results in considerably reduced re-circulation of dirt, dust and other foreign matter.

Features: Allows coils to be renovated without moving from location
Easy to use – a quick spray is all that is required to clean the filter
Penetrating action breaks down grime on chiller coils to restore cooling efficiently
Natural condensation automatically rinse coils clean
Non corrosive-can be safely used on aluminum, copper, steel and plastic

Directions: Dilute: To clean Air Conditioner coils: dilute 1 part Koil Kleaner with 5 parts water. Spray directly onto finned coils, making sure that all areas are penetrated. Turn unit on allowing for normal cycling to create condensation on cooler coils and fins. If faster cleaning is desired, Koil Kleaner may be rinsed after 5 minutes.

As filter adhesive ; use undiluted, spray or dip method works equally well. Inhibitors prevent corrosion of metal frames and filters.

Applications:

Coil Renovator
Filter Adhesive for cooling units
Wall units, remote cooling units, Refrigeration Chiller Units

12 X 1 Ltr
4 X 4 Ltr
