

ULTRA FLOOR FINISH

The Ultimate Floor Finish

ULTRA FLOOR FINISH delivers the ultimate shine for your floors. With its high solid content, it provides a strong and long-lasting finish while effectively sealing and enhancing the floor's appearance.

Burnishing: Can be burnished using high-speed equipment, including propane burnishers.

Dilution: Can be diluted up to 8:1 for use as a spray "clean and buff" or "restorer."

APPLICATION INSTRUCTIONS:

Preparation: Ensure the floor is clean and free of old finishes. Rinse thoroughly to eliminate residues from previous finishes, strippers, and cleaners.

Application: Use a new, clean mop head to apply the floor finish.

Coats: Allow each coat to dry for up to an hour before applying the next. Three coats are recommended for optimal results, though up to five coats can be applied for a deeper shine. Apply several thin coats rather than one thick coat.

Curing: Let the finish cure for 24-48 hours before burnishing.

Maintenance: Recoat periodically to maintain the finish. Stripping is not necessary unless the finish has worn down to the bare floor.

Cleaning and Maintenance: To maintain the beautiful finish, clean with Super Power Neutral Floor Cleaner.

AVAILABILITY:

4X4 litre Jugs

20 litre pail

2 Bowes Court, Bolton, Ont L7E 1A4 Phone: 416-875-5824 or 647-678-1830
