

Grease Buster

GREASE BUSTER: The Ultimate Cleaner and Degreaser

GREASE BUSTER is a powerful, concentrated, and fast-acting water-based cleaner and degreaser. Its high alkalinity enhances the cleaning power of organic surfactants, delivering exceptional results. With an added rust inhibitor, GREASE BUSTER is safe for use on metals.

GREASE BUSTER effectively removes grease, fats, oils, soot, smoke, crayons, waxes, stubborn soils, and certain inks from metal, concrete, plastic, rubber, enameled, and other hard surfaces. It also eliminates gas, oil, and other stains from concrete and asphalt without damaging the surfaces.

Asphalt: GREASE BUSTER tackles oil and grease on asphalt without harming the surface, despite asphalt's natural affinity for oils.

Concrete: Unlike acid-based cleaners that erode the surface, GREASE BUSTER cleans concrete effectively, preserving the integrity and preventing quicker soiling.

DIRECTIONS:

Concrete Cleaning:

1. Apply GREASE BUSTER to the affected area.
2. Let it sit for two minutes.
3. Agitate with a deck scrub brush.
4. Hose down the area well to flush away dirt and the alkaline cleaner.
5. Reapply for deeper cleaning.
6. For lighter cleaning, dilute GREASE BUSTER up to 4:1 with water.

General Cleaning:

- Dilute with 5-10 parts water.
- Spray or wipe on.

Wax or Floor Finish Removal:

- Dilute with 1-2 parts water.
- Apply with a mop.
- Rinse thoroughly and allow the floor to dry.

Formica and Countertops:

- Dilute with 20 parts water.
- Rinse or wipe clean.

Automatic Floor Scrubbers or Pressure Washers:

- Dilute with 10-20 parts water.
- Rinse all equipment thoroughly with water after use.

Machinery, Motors, and Equipment:

- Dilute with 4-10 parts water.

Availability:

4x4 litre jugs
12x 1 litre bottles
20 litre pail
