

AIR STREAMER is a WIFI router streaming up to 500 simultaneous users out of one single access point, in a range of 150+ meters and multiple floors.

Superiority...

A WIFI analyzer in exhibition hall of AIRCRAFT INTERIORS 2019 World Trade Show in Hamburg, measured all WIFI exhibitors' transmissions. With a signal strength of -41 dB, and closest competitor at -75 dB, AIR STREAMER has a double range and steaming capacity per -1dB difference. This law of physics proves AIR STREAMER is 200 times more performant than its closest competitor. Internet, TV and video on demand are covered.

Performances subject to field analysis

(Estimated)	ASL 010-2	ASL 010-3	ASL 010-4
Range open air.	150	500	500
Range in floors	2/50 m.	3/50 m.	3/150 m.
Users (max)	35	150	500
