

Flagrant offence is the best defth protection.

As an intruder show up on the yard, a notification is sent by SMS and views from field camera(s) become available on authorized cell phone or computers. They can then send an alert to intervention to Start action while intruders are still unaware. Our wireless battery powered cameras are easy hidden, jnstalled and removed anywhere.

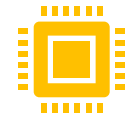

Cameras and monitoring software.

The monitoring server receives views from active triggered cameras, stores them and forward them to designated users. It can remote program them and mosaic display them on screen.

- The cameras:
- + Internal reloadable batteries
- + Autonomy 3 days
- + Image storage 4 GB
- + 4G/5G built in.
- + Poids 850 gr.
- + Internal SIM and antennas.
- + Motion detection up to 20 meters

Using the newest components and technologies, our units outperform any alternate solution in terms of performance and consumption.

The server unit displays received sequences and stores them. It can forward action instructions as programmed. The server can manage a unlimited number of cameras.

Transmission out of cameras are 4G/5G processed real time during a programmable time interval as long as the trigger sensor shows activity.
