moment	teacher	bright	present
rather	length	figure	natural

MISSION CONTROL

We are starting a new social studies unit! Think about being a California Native American and one day a ship arrives and some unusual people land near your village. We will learn about how this changed their lives FOREVER! Of course we'll learn a lot. BUT, we still have a lot of fun! We will learn about how they built missions and became the rulers of California. But, there's always a fun part! We will also play a fun team game together. The winning team by the end of the unit will earn an amazing prize! Stay tuned for details...

Got Rocks?

We will be hunting for rocks for awhile!

This week we will check out my huge rock collection. We will discuss and observe how rocks are different from each other. We will observe that rocks can be:

- smooth vs. rough
- shiny vs. dull
- soft vs. hard
- heavy vs. light
- many different colors
- many different patterns

IMPORTANT:

Make sure you are **NOT** collecting pebbles. We are looking at a lot of those also this week to see how to recognize pebbles.

Three rocks will be due on Monday

(2/13). You can find lots of rocks just walking the neighborhood or at the park. You will be earning points each week towards your science grade this trimester. Feeling worried? **You can always show me your rocks throughout the week for feedback.**
