## Hello, Friends!

### It's World Health Day

April 7 we celebrate the work of nurses and midwives, reminding world leaders of the critical role they play in keeping the world healthy. Nurses and other health workers are at the forefront of the coronavirus, providing quality, respectful care and treatment, addressing fears and questions and collecting data for studies. Quite simply, without nurses, there would be no response. **More on World Health Day...**

### World Health Organization

We are launching the first ever **State of the World's Nursing Report 2020**. The report provides a global picture of the nursing workforce and planning to optimize the contributions of this workforce to improve health and wellbeing for all.
