

TESTIMONIALS

"Kate helped me realize my cat was manipulating me for attention. Once she taught me how to think of him as a healthy animal most of his symptoms cleared up."

Lewis – Montana

"I met Kate at a conference and knew immediately that she was a woman with a sharp, intelligent mind. What really struck me was her compassionate heart -- not only for animals, but also for people. Her journey to practice her art has brought Kate to a place where when she speaks to my dog, Niko, and tells me what he said, I know it is his personality she is bringing back to me in articulate, detailed information about his health and well-being. She has brought my dog healing, and in doing so has brought it to me as well!"

Donna – Oregon

"Casey, my terrier, had multiple issues that cost a lot of time and money. Kate settled his system and now we only go to the vet for grooming."

Bridget – Missouri

"I'm so happy to report what looks to be a complete healing of my cat's persistent eye infection. I have a 17-year-old cat and last year he developed an infection in one eye. After multiple vet visits and eye drops and eye ointments and oral antibiotics and wearing a cone for 4 months there was no improvement. His eye was cloudy and red and inflamed and gooey. After the first session with Kate I could see some definite improvement. We had stopped using eye ointment a few weeks after the session. Two months later I asked her to do another session because I felt we could get a little more healing for him. Now, a little over two months since then his eye looks completely normal. I had thought he lost vision in the eye because it was so clouded over and it looked like it wasn't tracking. But now - his eye is clear, I can see the pupil and I think he has at least partial vision back! Thank you Kate for the wonderful gift you have given Spanky!"

Andi – New Mexico
