

# AQUACIAT

## Free Cooling

**Range :**  
9 models available

**Range of use :**  
Cooling capacity from 185 to 485 kW

**Use :**  
The FREE COOLING system integrated AQUACIATPOWER range allows significant energy savings to be made by tapping into the kilo calories contained in the outdoor air as soon as the climatic conditions allow rather than using a refrigerating circuit.

The energy efficiency of the system can thus reach an EER of 60.

**Description :**

- Air/water exchange coil placed in front of the water chiller
- Simultaneous operation with the water chiller
- Piloting of both the free cooling module and the water chiller via AeroCONNECT optimising the operation of the overall installation and the recovery of calories
