

# CONDENCIAT CD

**Range :**  
13 models available

**Range of use :**  
Cooling capacity: 25 to 165 kW

**Use :**  
Medium-capacity air-cooled condensing unit cools spaces in residential buildings and commercial, industrial and healthcare facilities. May be connected from a distance to a direct-expansion heat exchanger (air-handling unit coil or a multi-tube or brazed-plate water-cooling evaporator). Designed as standard for outdoor installation without any special weather protection.

**Description :**

- R-410A refrigerant,
- Compact, space-efficient unit,
- Fully encased in a housing constructed of coated metal panels that can be detached for outdoor installation,
- One or two independent refrigerant circuits,  
One to four new-generation, high-efficiency scroll compressors,
- One to two propeller fans,
- Electromechanical relays for simplified, fail-safe control.
